unicont.com

NPK «Morsvyazavtomatica» group of companies is driven by a team of competent professionals united with the challenging ambition to develop a high-quality production of shipborne and industrial equipment. Implementing the most audacious ideas, using first class scientific and technological approaches and the latest technologies available, enables NPK to offer state-of-the-art systems and products.

NPK obtained following certificates:

- Own high-quality scientific, engineering and manufacturing units.
- Our customers are civil industrial companies.
- We focus on innovative and high-tech production.
- Over 600 skilled professionals in our team.
- 24.000 m² of office and manufacturing facilities.
- 40+ state of the art CNC machines are in operation.
- Registered Trademarks: **Unicont, Unimach, NPK MSA**.

Company's philosophy

NPK's strategy is a comprehensive approach towards the customer needs. Research, design, production, equipment integration into existing operating systems, installation, operator training, warranty and post-warranty service are in our focus. We in NPK have implemented cost-effective and time efficient manufacturing cycles.

Our key-principles are **Safety** at sea, **Reliability** and **High quality**.

NMEA 0183 Amplifier-distributor
MDU-102

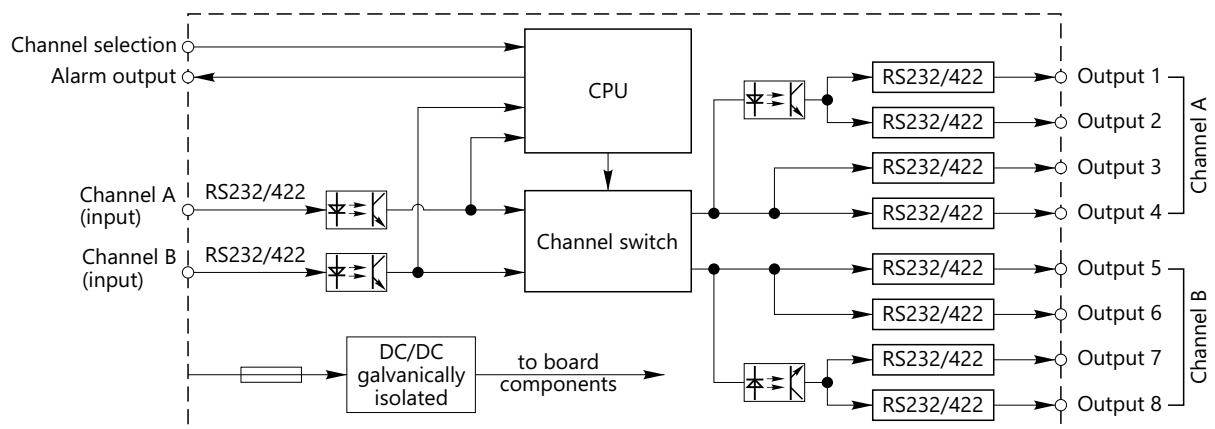

The MDU-102 is designed for the multiplication of NMEA 0183 signals, version 1-3 (IEC 61162-1, 61162-2) or other serial data transmissions via RS-232 and RS-422/485 interfaces from one or two sources. The unit provides a checksum test for data received on the first channel.

TECHNICAL CHARACTERISTICS

General characteristics		Characteristics of inputs	
IP rating	IP 22	Number of input ports	2 (CH1, CH2)
Storage temperature	-60...+70°C	Supported interfaces	RS-232, RS-422/485
Operating temperature	-15...+55°C	Maximum receive rate	1200-115200 bit/s
Weight	0.5 kg	Optoisolation of inputs	+
Electrical characteristics		Characteristics of outputs	
Power supply voltage	10...36 VDC	Number of output ports	8 (2x4)
Power consumption	max 3 W	Number of output groups	2 (A and B)
Galvanic isolation from power mains	+	Galvanic isolation	4 x – non-isolated 4 x – optoisolated
Reverse polarity protection	+	Supported interfaces	RS-232, RS-422/485
Oversupply protection	+	Maximum baud rate	1200-115200 bit/s

MDU-102 dimensional drawing

MDU-102 functional diagram

NMEA 0183 Amplifier-distributor

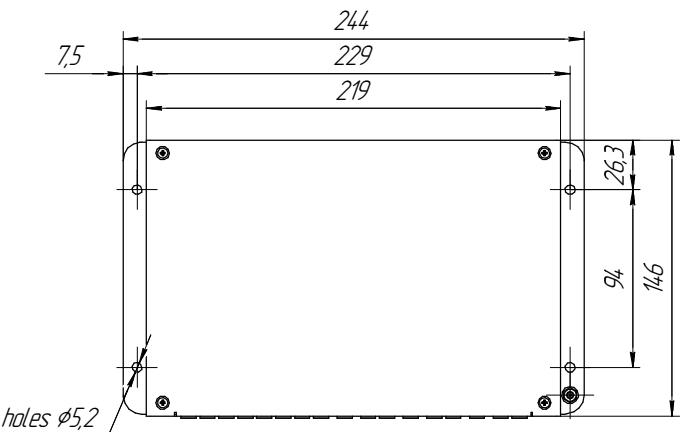

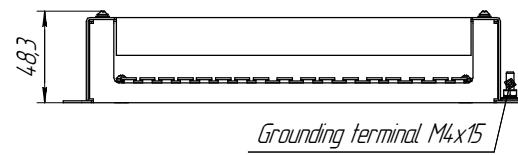

ADU-202

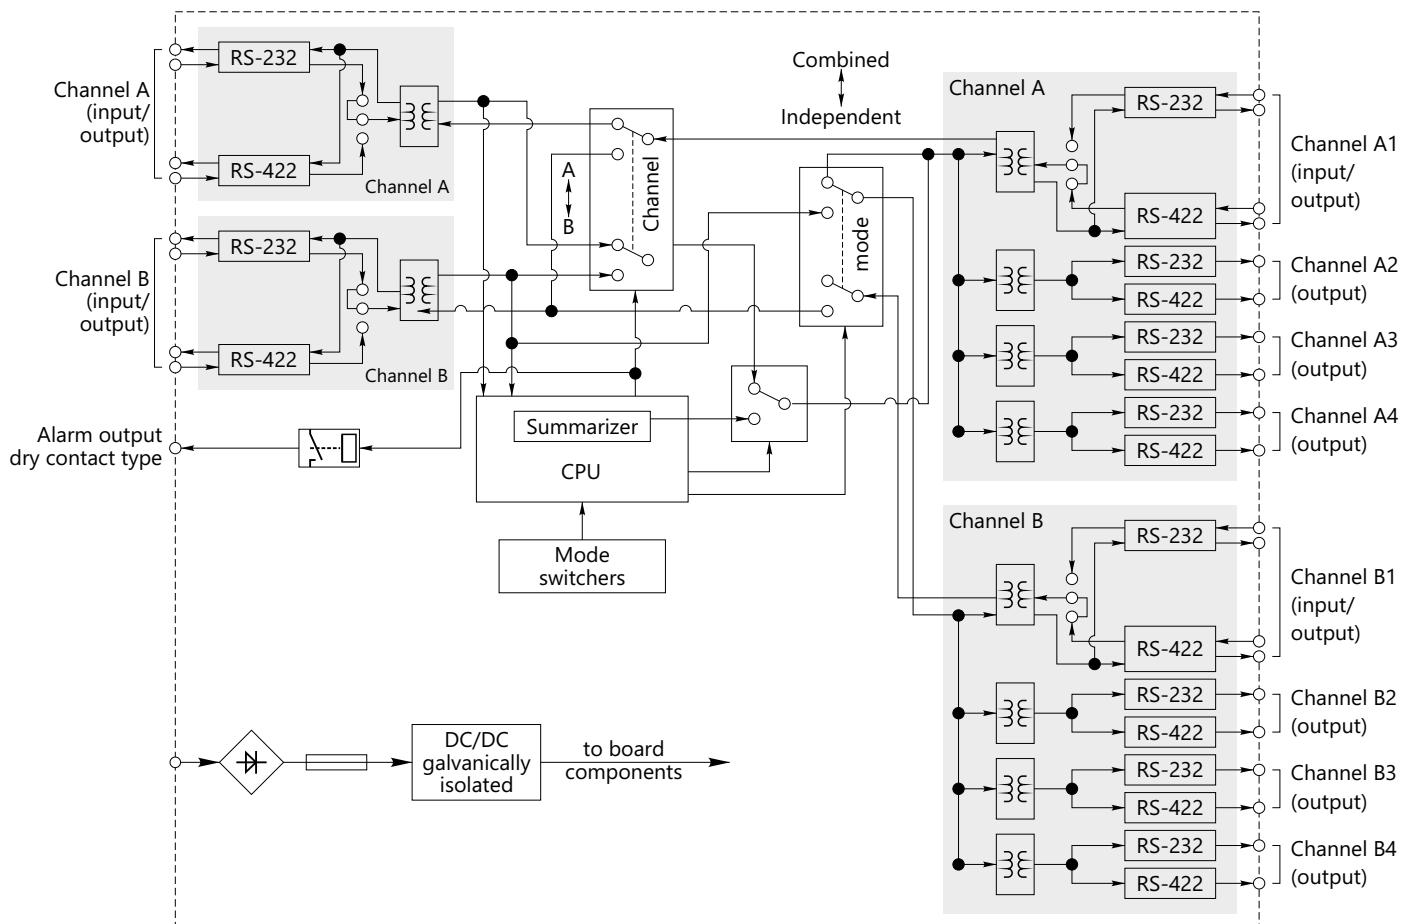

The ADU-202 is designed for the amplification and multiplication of NMEA 0183 signals, version 1 and 2, or other serial data transmissions via RS-232 and RS-422/485 interfaces. An integrated summarizer combines the input NMEA 0183 sentences and transmits the results to one or two output groups, depending on the jumpers' position on the printed circuit board.

TECHNICAL CHARACTERISTICS

General characteristics		Characteristics of inputs	
IP rating	IP 22	Number of input ports	2 (A, B)
Storage temperature	-60...+70°C	Supported interfaces	2 (RS-232, RS-422/RS-485)
Operating temperature	-15...+55°C	Max receive rate	230 400 bit/s
Weight	1.2 kg	Optoisolation of input ports	+
Electrical characteristics		Characteristics of outputs	
Power supply voltage	19...36 VDC	Number of output groups	2 (A, B)
Power consumption	max 5 W	Number of output ports per each group	4
Galvanic isolation from power mains	+	Number of interfaces per each output port	2 (RS-232, RS-422/RS-485)
Reverse polarity protection	+	Isolation of output ports	+
Oversupply protection	+	Total number of output ports	16
		Maximum baud rate	230400 bit/s

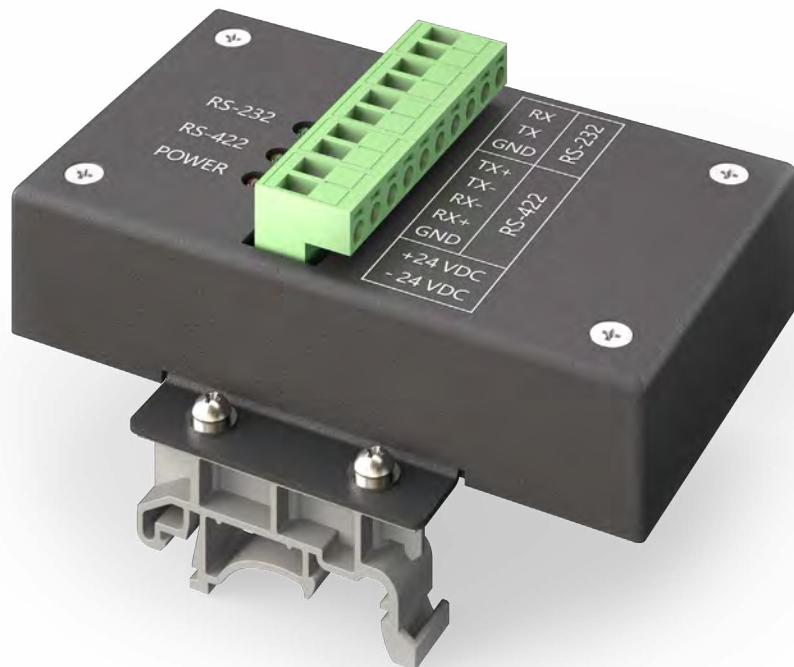

ADU-202 dimensional drawing

ADU-202 functional diagram

Bidirectional RS-232/422 converter

RS-104

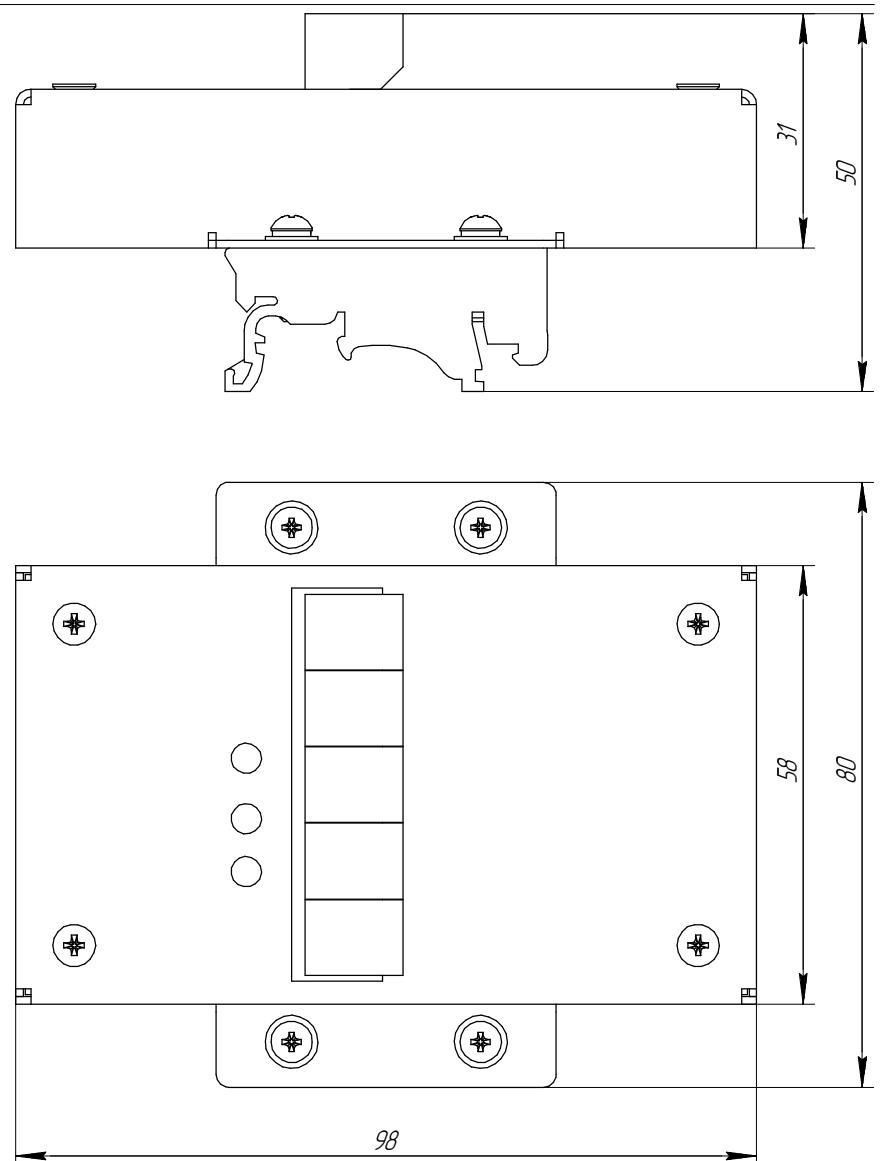

The RS-104 Interface converter is designed for the signal conversion between two standards: RS-232 and RS-422. It is the solution to combine equipment operating with RS-232 or RS-422 signals on river- and sea-going vessels.

TECHNICAL CHARACTERISTICS

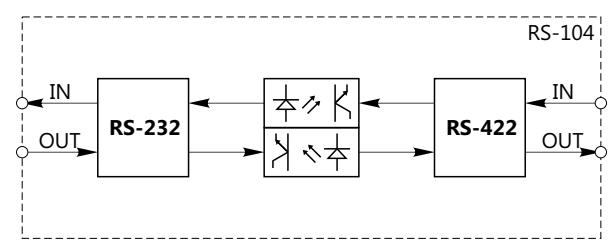

General characteristics	
Storage temperature	-60...+70°C
Operating temperature	-15...+55°C
Weight	0.2 kg
Electrical characteristics	
Power supply voltage	8...40 VDC
Power consumption	3 W

Delivered with DIN-rail mount.

Characteristics of inputs	
Number of input ports	2
Supported interfaces	RS-232 and RS-422
Receive rate	4800-115200 bit/s
Optoisolation of inputs/outputs	+
Characteristics of outputs	
Number of output ports	2
Supported interfaces	RS-232 and RS-422
Maximum baud rate	4800-115200 bit/s

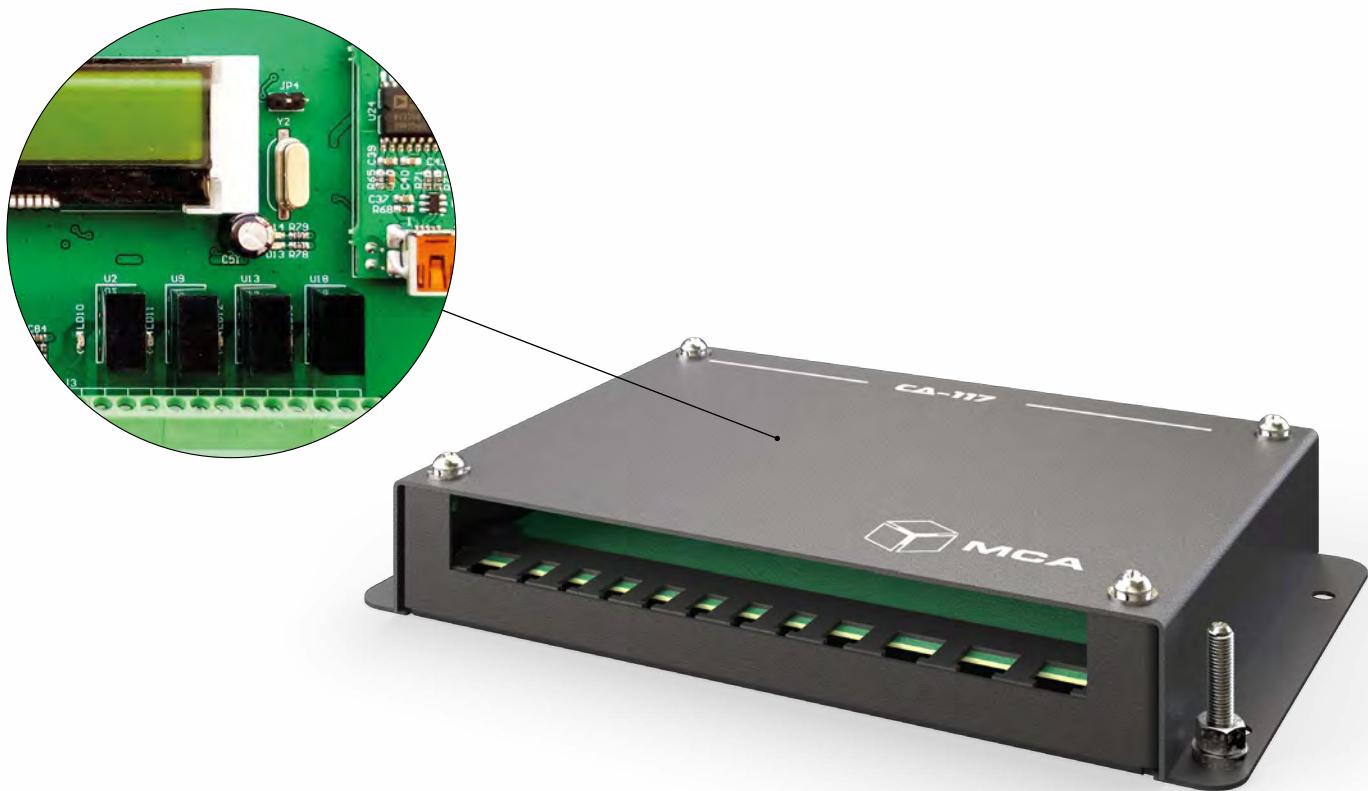

RS-104 dimensional drawing

RS-104 functional diagram

NMEA data combiner **NC-117**

The NC-117 receives NMEA 0183 messages via eight RS-232/422 inputs and 1 USB port. It combines the received messages according to the customer settings and repeats them via four RS-232/422 outputs and 1 USB port.

The unit will combine sentences of standards starting with \$ or ! or # and ending with <CR> and <LF> («carriage return» (CR) and "line feed" (LF) symbols).

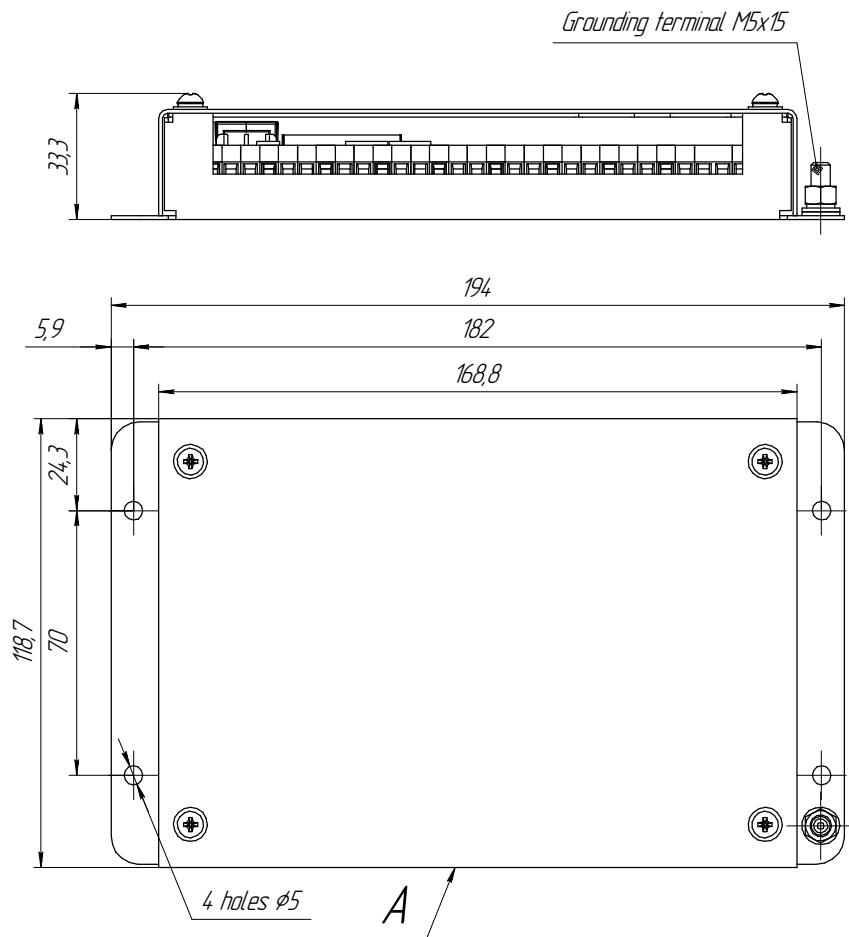

TECHNICAL CHARACTERISTICS

General characteristics	
IP rating	IP 22
Storage temperature	-60...+70°C
Operating temperature	-15...+55°C
Weight	0.7 kg

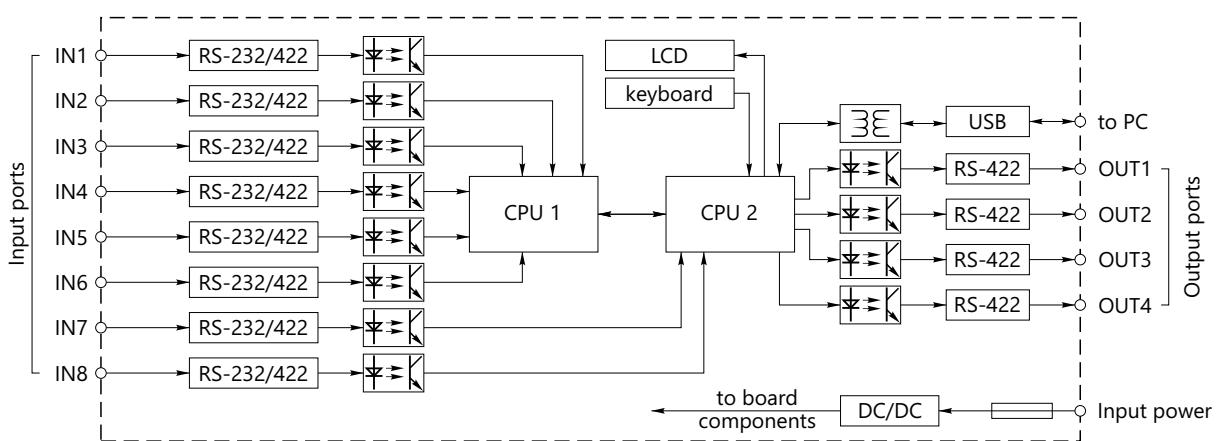

Electrical characteristics	
Power supply voltage	9...36 VDC
Power consumption	max 7 W
Galvanic isolation from power mains	+
Reverse polarity protection	+
Oversupply protection	+

Characteristics of inputs/outputs	
Number of input ports	8xRS-232, RS-422/485+USB
Number of output ports	4xRS-232, RS-422/485+USB
Receive/baud rate	2400-115200 bit/s
Signal format	NMEA 0183 versions 1-3 (IEC 61162-1, 61162-2) or other serial data transmissions
Optoisolation of input ports	+
Optoisolation of output ports	+
Data combining	Configured for each port

Grounding terminal M5x15

NC-117 dimensional drawing

NC-117 functional diagram

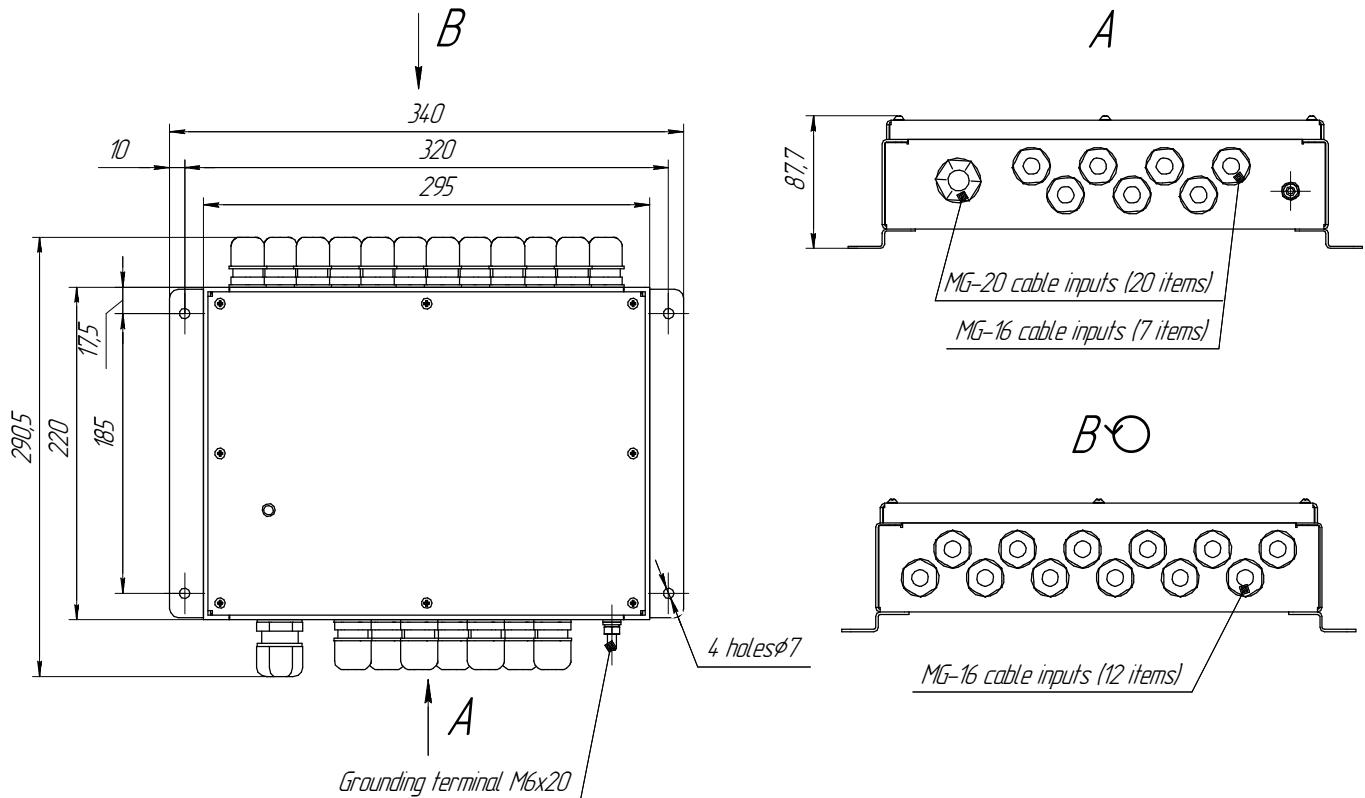

Data combiner **NC-217**

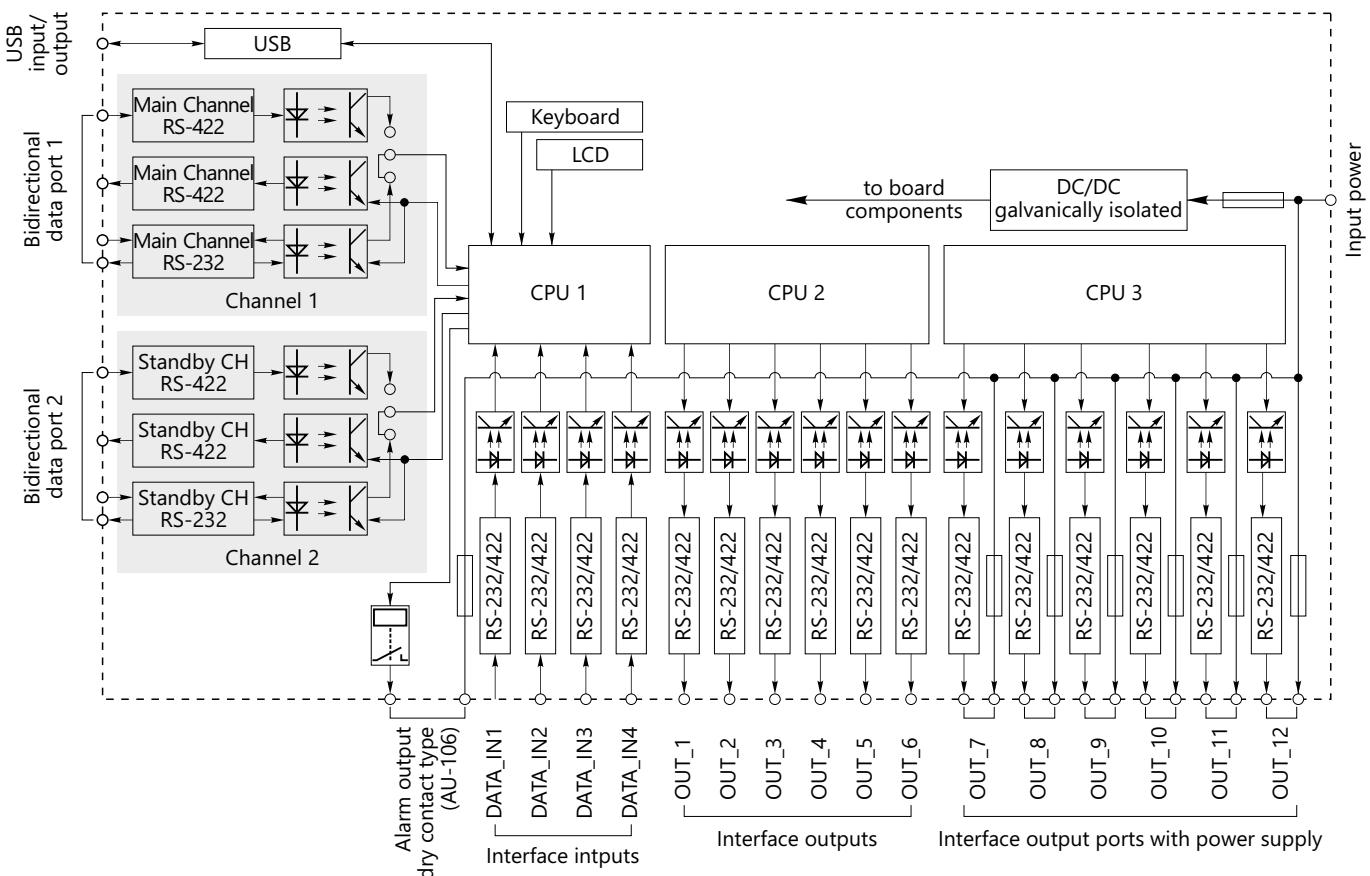

The NC-217 receives NMEA 0183 messages via four RS-232/422 inputs, combines them according to the customer settings and repeats them via twelve RS-232/422 outputs. Two additional bidirectional service ports and 1 USB are provided.

TECHNICAL CHARACTERISTICS

General characteristics		Characteristics of inputs	
IP rating	IP 22	Receive rate	4800 - 115200 bit/s
Storage temperature	-60...+70°C	Number of input ports	4
Operating temperature	-15...+55°C	Supported interfaces	RS-232/422
Weight	3.3 kg	Data reception formats	NMEA0183, ver. 2, 3 (checksum test CRC)
Electrical characteristics		Optoisolation of inputs	+
Power supply voltage	9...36 VDC	Characteristics of outputs	
Power consumption	max 20 W	Maximum baud rate	4800 - 115200 bit/s
Galvanic isolation from power mains	+	Number of output ports	12
Reverse polarity protection	+	Supported interfaces	6 x RS-232/422, 6 x RS-232/422 with terminals for load supply
Oversupply protection	+	Galvanic isolation	+
General characteristics of ports		Characteristics of service ports	
Data receive formats	NMEA0183, vers. 2, 3 (checksum test)	Number of ports	3
Selection of NMEA message	Configured for each port	Supported interfaces	2 x RS-232/422, 1 x USB

NC-217 dimensional drawing

NC-217 functional diagram

Multipurpose data converter
DFR-118

The DFR-118 data converter processes received NMEA data and repeats them to units connected to the converter output port. Depending on the software used, the unit is capable to filter and change baud and frequency rate of the data stream, adjust letter and digit of the NMEA sentences and add a checksum.

Customizable software can be developed to meet all customer needs.

TECHNICAL CHARACTERISTICS

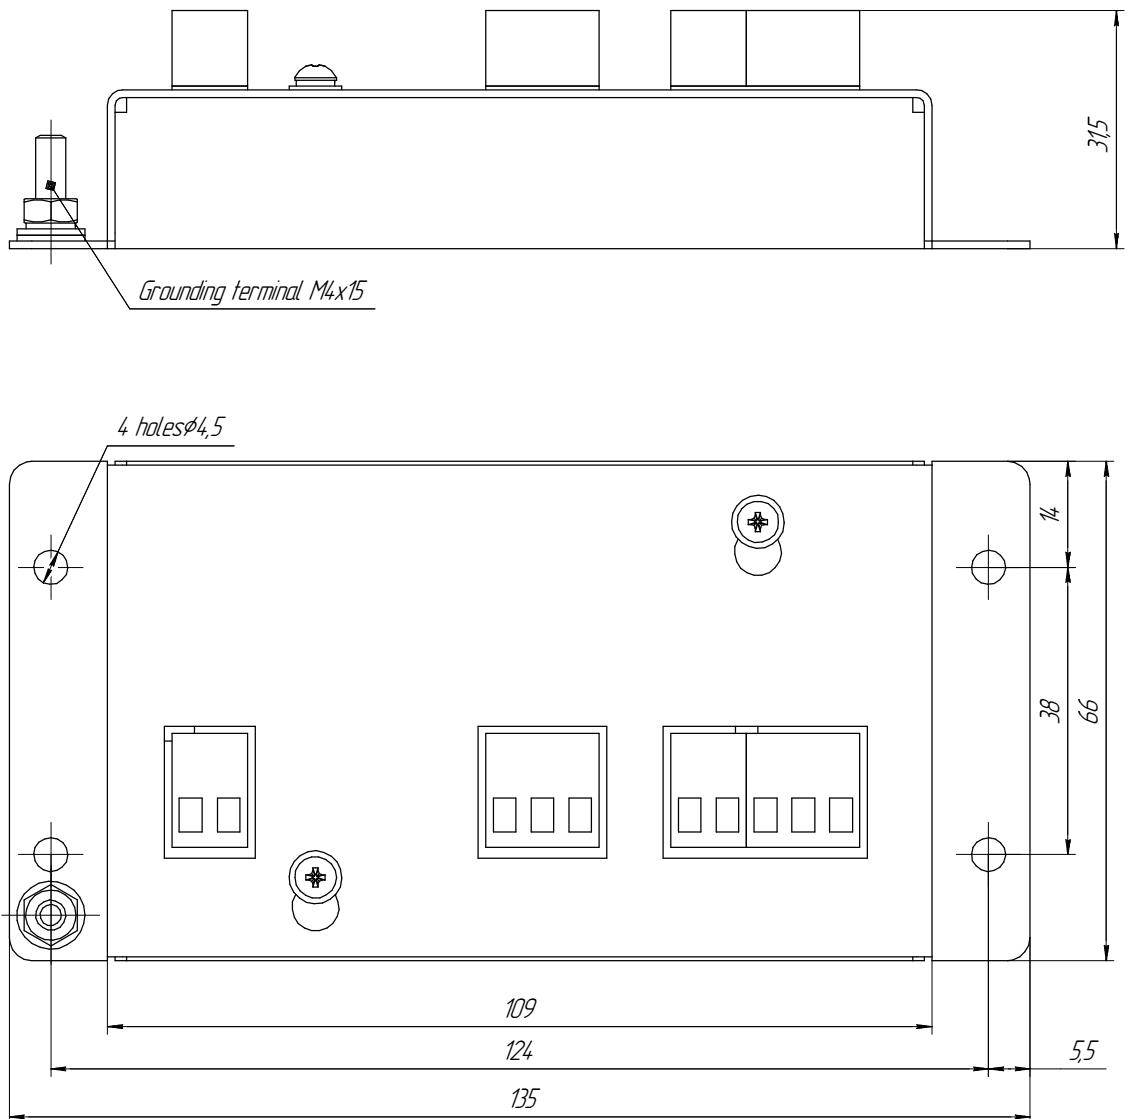

General characteristics	
IP rating	IP 22
Storage temperature	-55...+75°C
Operating temperature	-25...+55°C
Weight	0.265 kg

Electrical characteristics	
Power supply voltage	10...36 VDC
Power consumption	1 W
Reverse polarity protection	+
Overvoltage protection	+

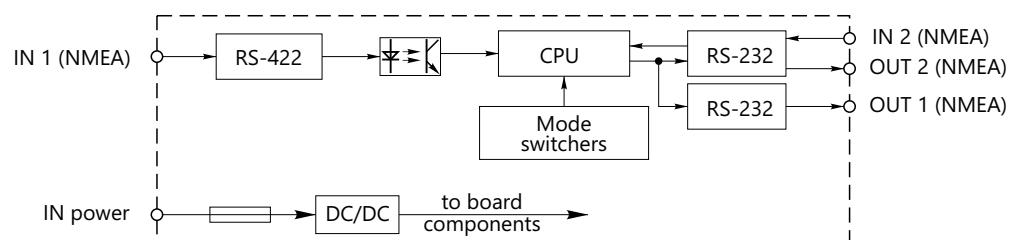

Characteristics of inputs	
Number of input ports	1
Supported interfaces	RS-232, RS-422
Receive rate	4800-115200 bit/s

Characteristics of outputs	
Number of output ports	1
Supported interfaces	RS-232, RS-422
Maximum baud rate	4800 - 115200 bit/s

Customizable software can be provided according to the customer requirements.

DFR-118 dimensional drawing

DFR-118 functional diagram

Analog-to-digital converter (gyrocompass and log signals)

ADPC-101

The ADPC-101 is designed to digitize obsolete analog signals from gyrocompasses and logs into NMEA 0183 format and to transmit the converted data to the relevant navigational equipment.

TECHNICAL CHARACTERISTICS

General characteristics	
IP rating	IP 22
Storage temperature	-60...+70°C
Operating temperature	-15...+55°C
Weight	1.4 kg

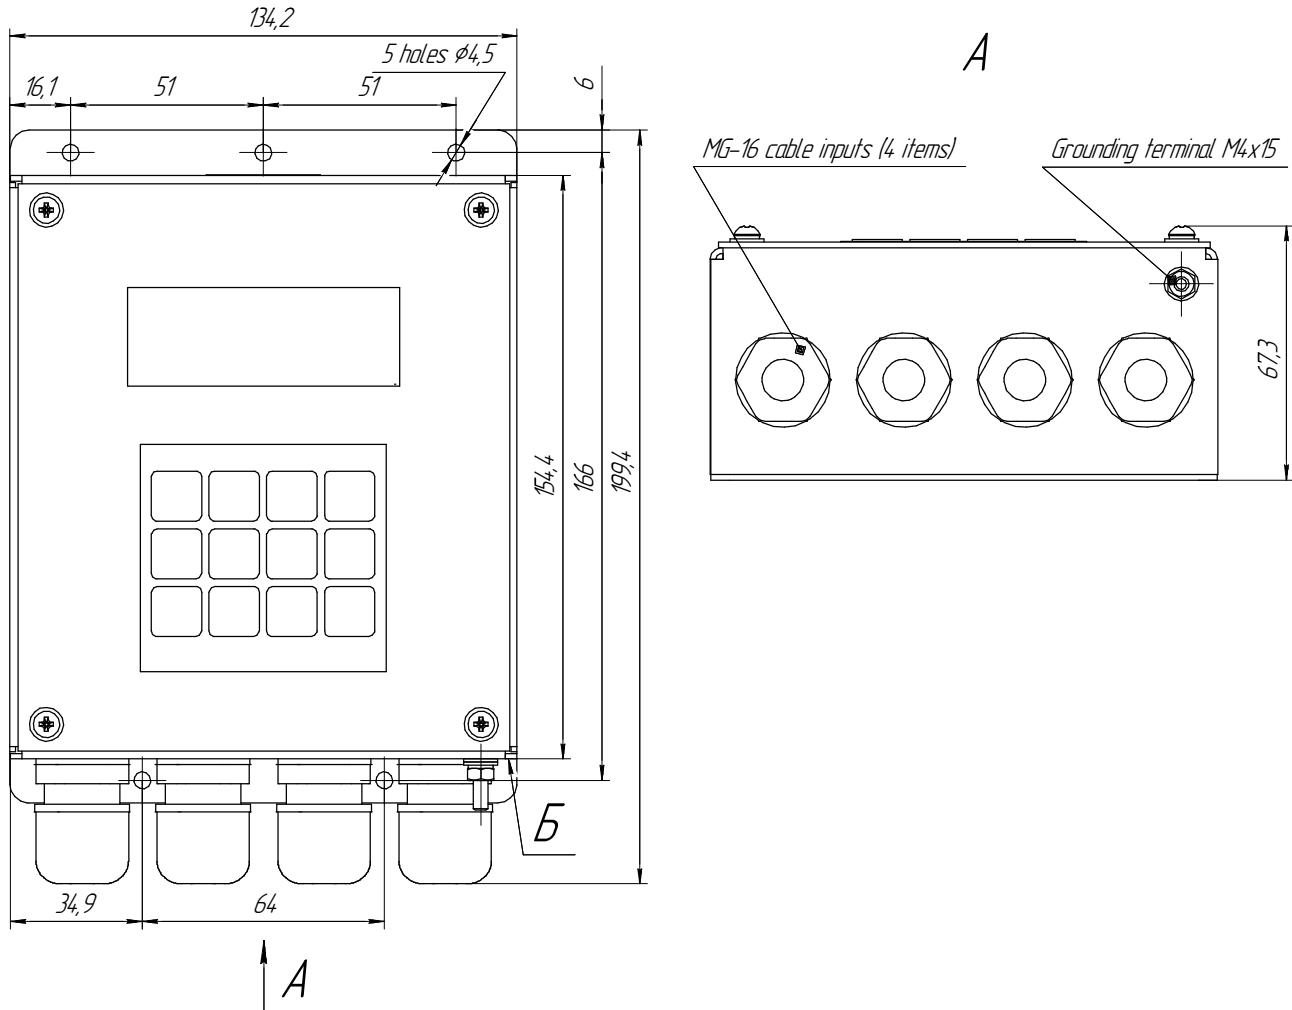

Electrical characteristics	
Power supply voltage	10...36 VDC
Power consumption	2 W

Types of equipment connected	
Gyrocompasses	selsyn (synchro) type stepper type
Logs	stepper log type (pulse) log with closing contact interface

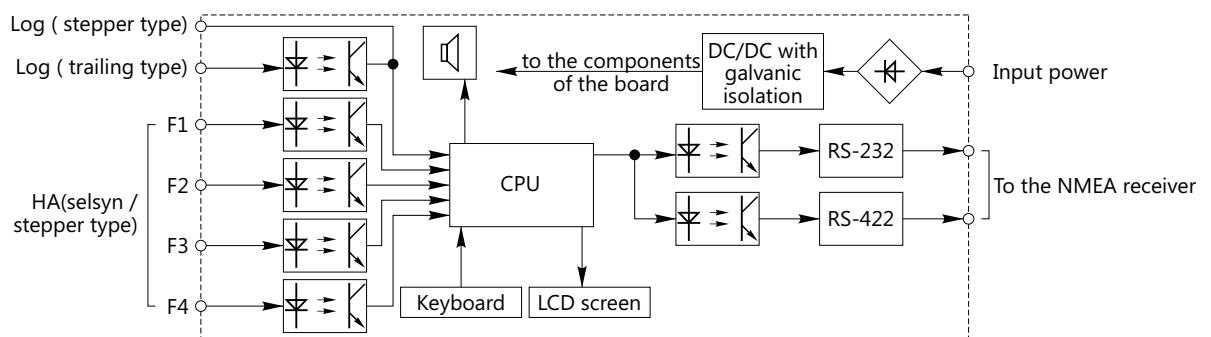

Output signal	
Output signal format by ports RS-232 and RS-422/485	NMEA-0183 1-3 (IEC-61162) with line checksum
Line options NMEA-0183	63 (configured)

	Range of measured values	Data accuracy
Speed	0...99.9 knots	0.1 knots
Course	0...359.9 degrees	0.1 degrees

Input signals	
Gyrocompass:	
Sine voltage of synchro windings	+
Voltage pulses	+(stepper type)
Voltage	up to 350 V
Gyro ratio	360x, 240x, 180, 90x, 60x, 36x
Frequency	up to 500 Hz
Rate of course change (rate of turn)	up to 80 degrees/s
Log:	
Voltage pulses	+(stepper type)
Closing contact	+
Voltage	up to 350 V
Pulses per mile	100/ 200/ 300/ 400/ 500/ 600

NMEA 0183 to AD-10S converter

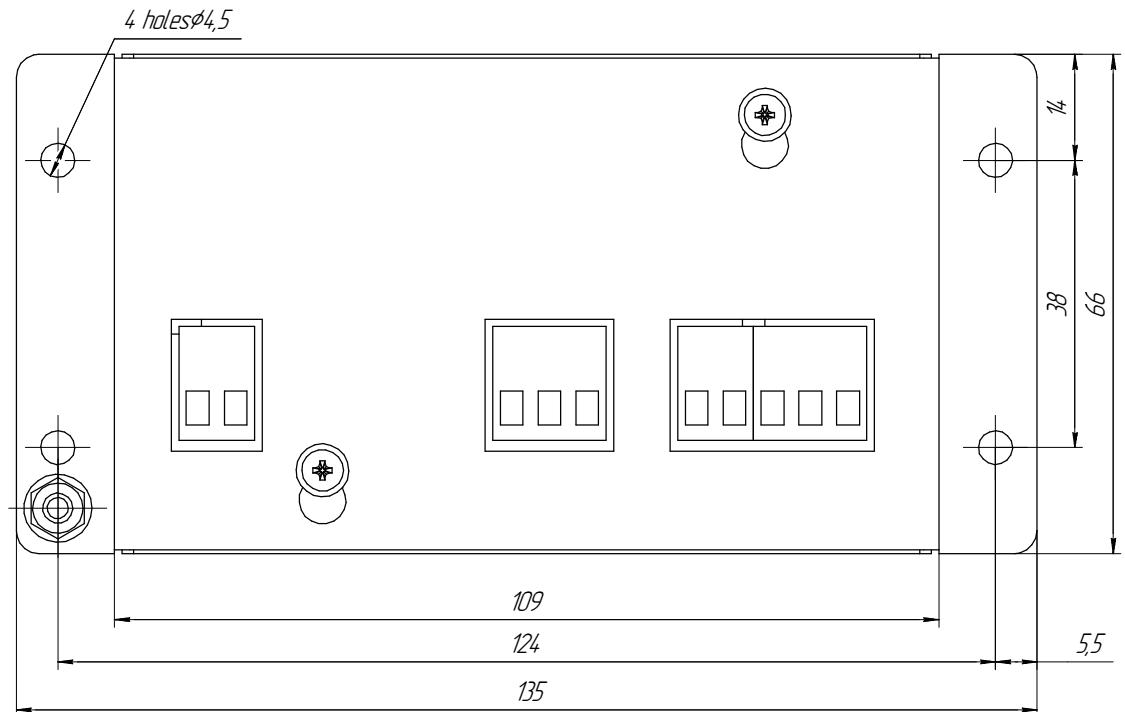

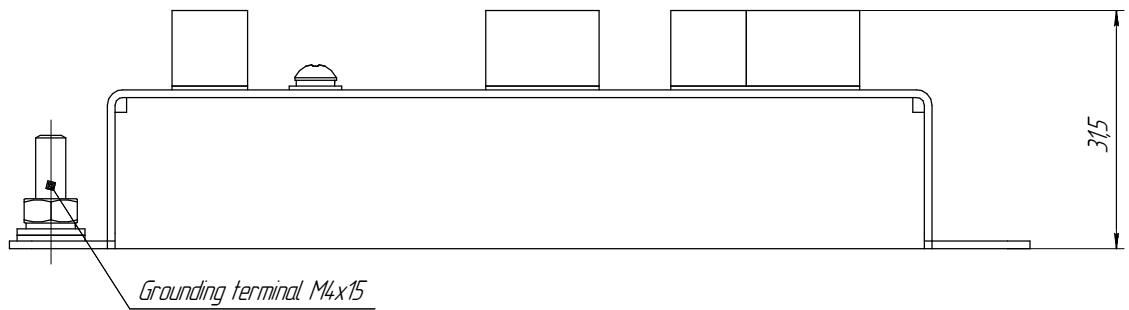

NTA-115

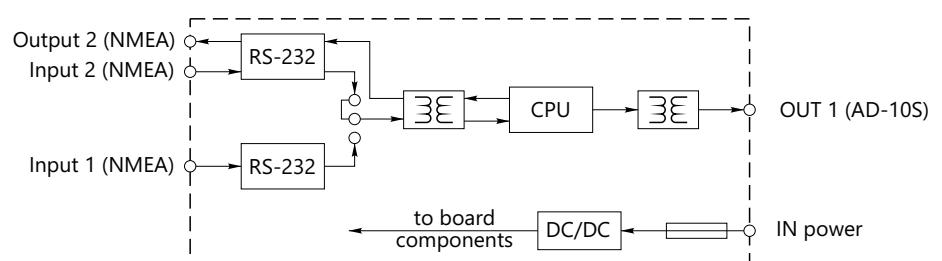

The NTA-115 converts ship course data received in NMEA 0183 sentences into AD-10S format. The unit connects devices not equipped with AD-10S-output to various Furuno equipment.

TECHNICAL CHARACTERISTICS

General characteristics		Characteristics of inputs	
Storage temperature	-55...+75°C	Supported interfaces	RS-232, RS-422
Operating temperature	-15...+55°C	Received NMEA sentences	xxHDT, xxOSD, xxVHW
Weight	0.29 kg	Input data type	course value
Electrical characteristics		Characteristics of outputs	
Power supply voltage	9...40 VDC	Output data type	AD-10S
Power consumption	2 W		
Reverse polarity protection	+		
Oversupply protection	+		

NTA-115 dimensional drawing

NTA-115 functional diagram

Digital-to-analog converter / Heading converter

DAC-109

The DAC-109 converts digital course data received in NMEA format into synchrosignals required to control analog repeaters and other selsyn-based equipment.

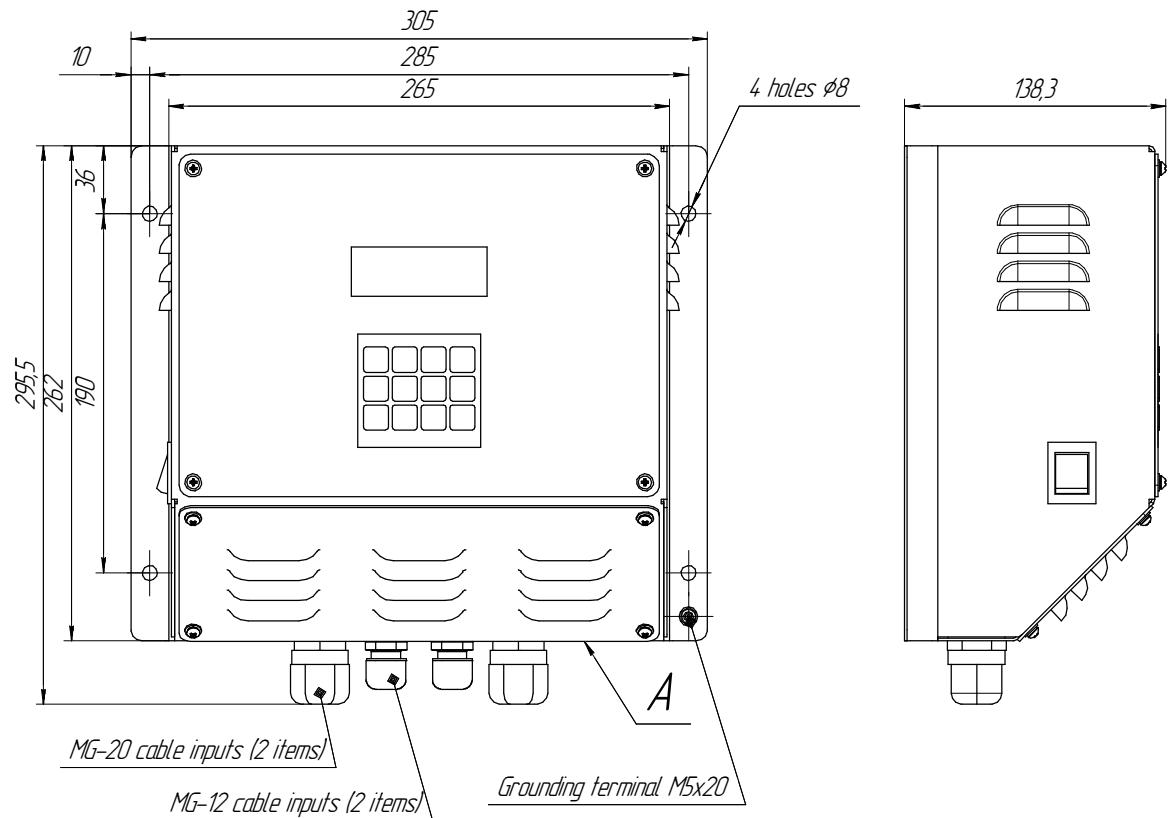

The unit may be used as a digital repeater to display the current course data.

TECHNICAL CHARACTERISTICS

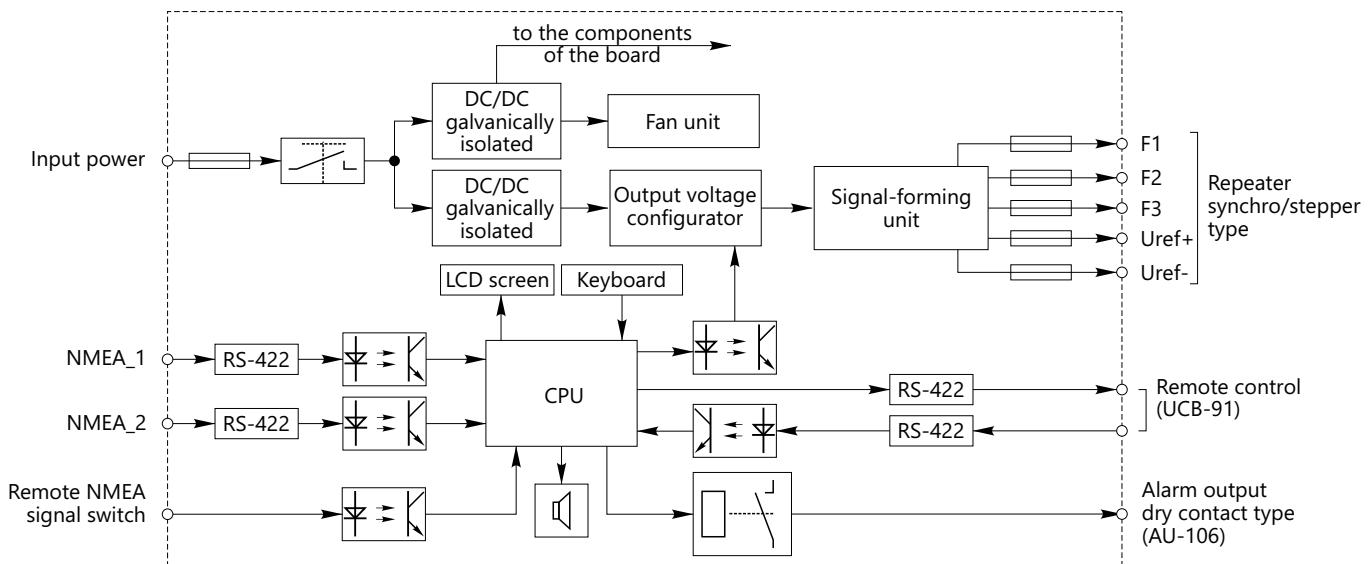

General characteristics	
IP rating	IP 22
Storage temperature	-55...+70 °C
Operating temperature	-15...+55 °C
Weight	6 kg

Electrical characteristics	
Power supply voltage	9...36 VDC
Max total power consumed by connected selsyns	250 W
Frequency of output alternating voltage	50 Hz / 500 Hz
Galvanic isolation from power mains	+
Reverse polarity protection	+
Oversupply protection	+

Characteristics of digital inputs	
Number of input ports	1+1 (main, standby)
Supported interfaces	RS-232/422/485
Receive rate	up to 115 200 bit/s
Optoisolation of inputs	+
Supported protocols	NMEA 0183 ver. 1 -3
Supported NMEA sentences	xxHDG, xxHDT, xxHDM
Characteristics of outputs	
Maximum number of connected synchro-receivers	8
Types of connected analog repeaters	Synchro/Step

DAC-109 functional diagram

Pulse width controller

IWR-123

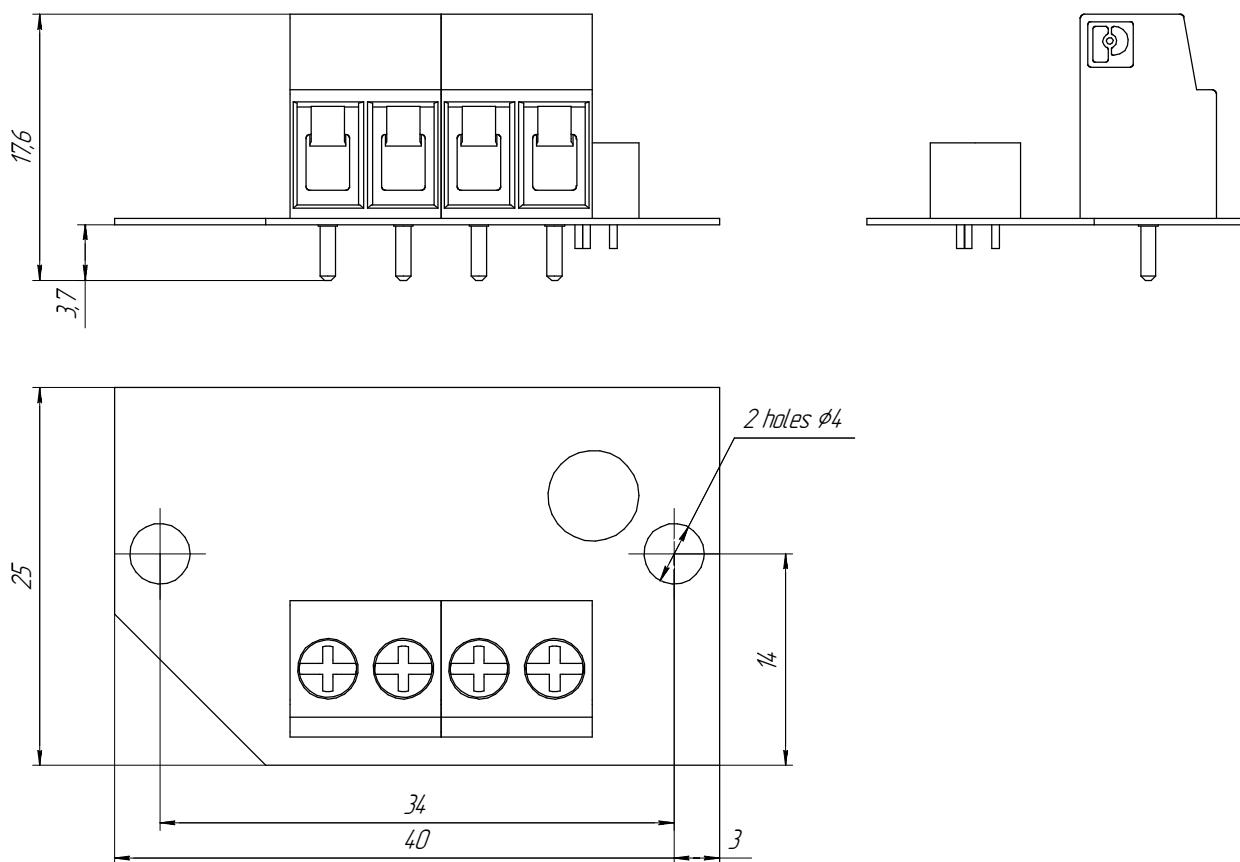

The IWR pulse width controller harmonizes the pulse time of different radio navigational equipment. Regardless of the output pulse time, the IWR-123 regulates the output signal within 10-300 microseconds.

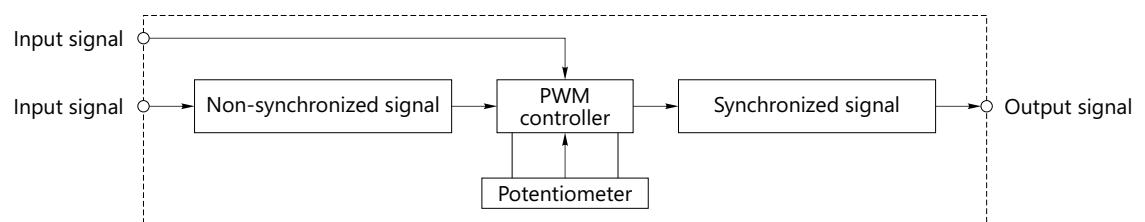

TECHNICAL CHARACTERISTICS

General characteristics	
Storage temperature	-60...+70 °C
Operating temperature	-15...+55 °C
Weight	0.1 kg
Electrical characteristics	
Power supply voltage	8...20 VDC
Current consumption	max 100 mA

Characteristics of inputs	
Number of input ports	1
Input signal amplitude	(0.6...1)·Vcc
Input signal time	5...300 µs
Input resistance	2.2 kOhm
Characteristics of outputs	
Number of output ports	1
Adjustment range of output signal	10...300 µs
Output signal amplitude	(Vcc-2) V
Max load current	30 mA

IWR-123 dimensional drawing

IWR-123 functional diagram

Power supply unit

PS-103

The PS-103 power supply unit with a rated power of 192 W operates with 110 (optional) / 220 VAC and provides unregulated power of 24V for various shipboard and industrial equipment. The PS-103 has an input for a standby storage battery (24 VDC) with automatic switching in the event of a main power supply failure. A power loss actuates the closing of built-in dry relay contacts.

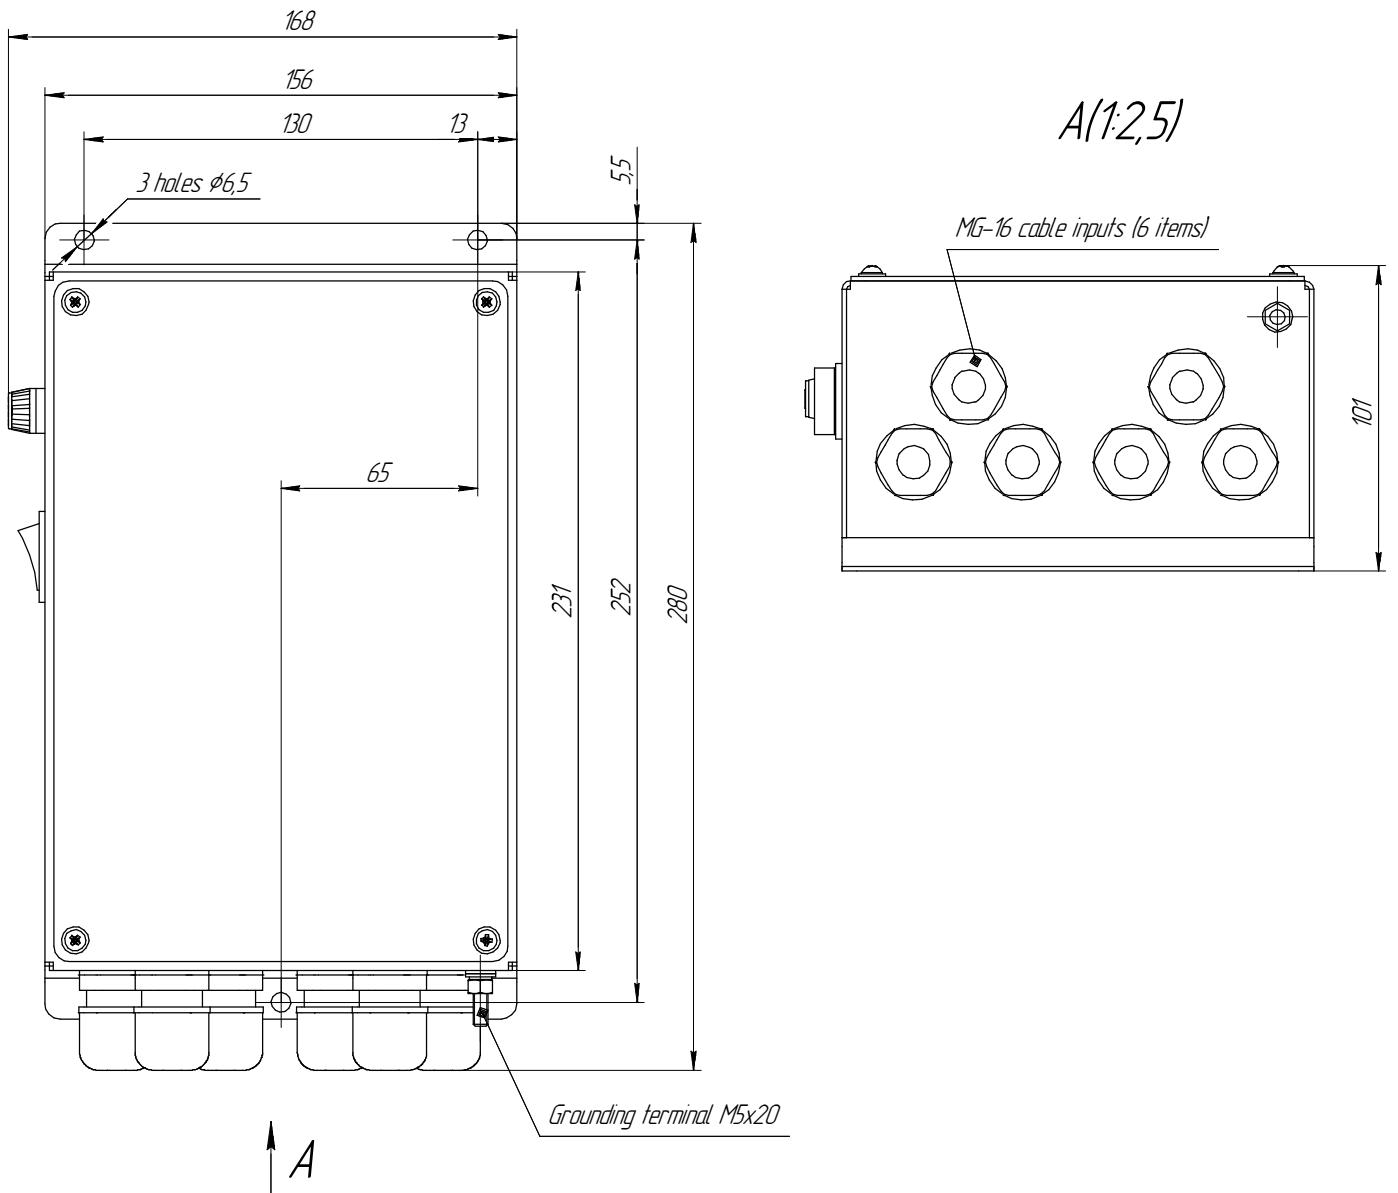

The unit is designed for installation in a dry environment (IP22). Galvanic isolation of power circuit, load, and current overload protection are provided.

TECHNICAL CHARACTERISTICS

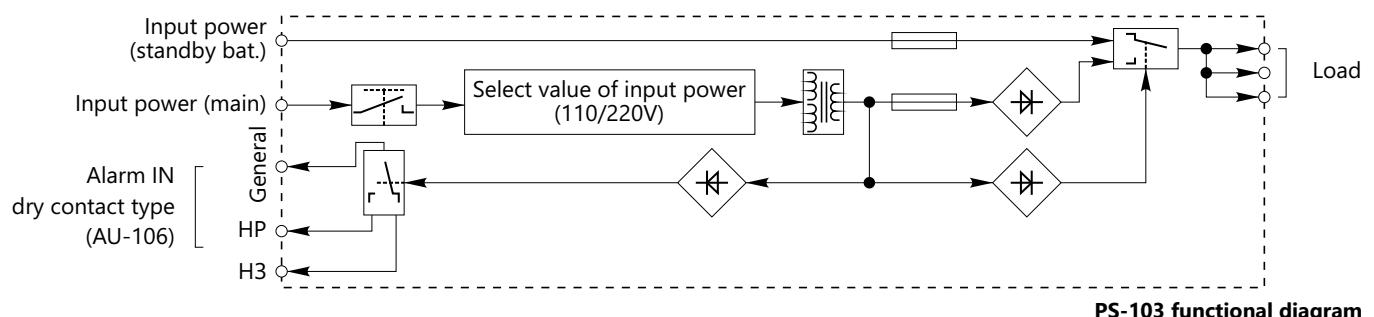

General characteristics	
IP rating	IP 22
Storage temperature	-60...+70 °C
Operating temperature	-15...+55 °C
Weight	4.6 kg
Current overload protection	+

The AU-106 may be used as an Alarm unit (see p. 60).

Electrical characteristics	
Power supply voltage	110 V (optional)/ 220 V, 50-60 Hz
Output voltage	18...31 V DC
Rated power	190 W
Rated load current	10 A
Terminals for connected loads	3
Galvanic isolation from power mains (for main power)	+

PS-103 dimensional drawing

PS-103 functional diagram

Power supply unit
PS-103-20

The PS-103-20 with a rated power of 192 W is designed to operate with 110 (optionally) / 220 VAC and provides unregulated power of 24V for various shipboard and industrial equipment. The PSU has an input for a standby storage battery (24 VDC) with an automatic switchover in the event of a main power supply failure. A power loss actuates the closing of built-in dry relay contacts.

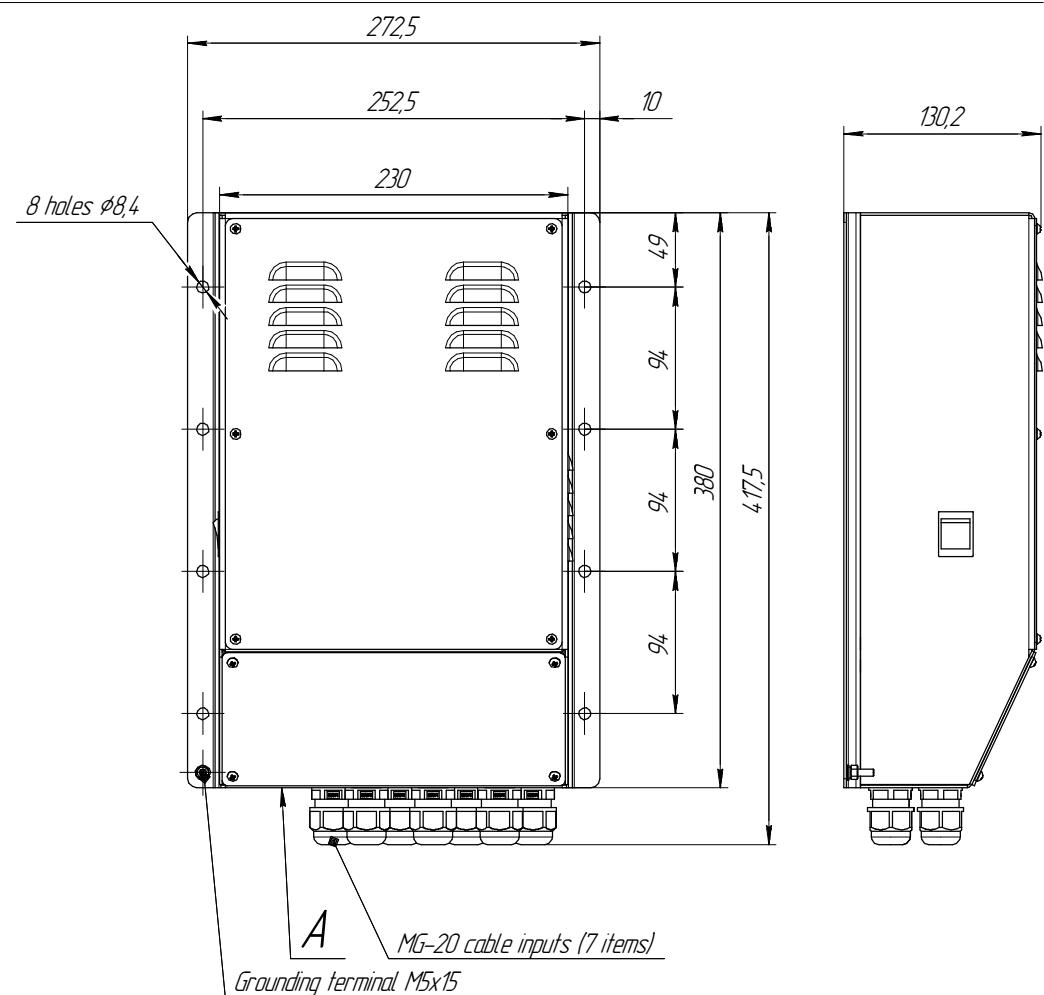

Install in a dry environment (IP22). Galvanic isolation of the power circuit, load, and current overload protection are provided.

TECHNICAL CHARACTERISTICS

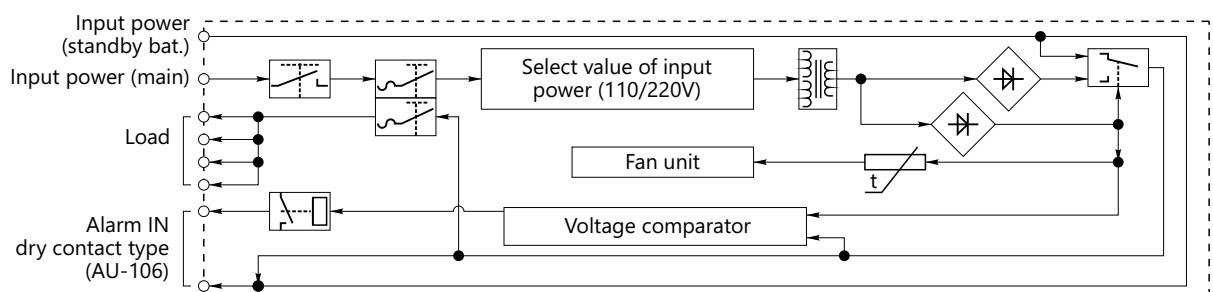

General characteristics	
IP rating	IP 22
Storage temperature	-60...+70°C
Operating temperature	-15...+55°C
Weight	9.385 kg
Degree of efficiency	up to 93%
Current overload protection	+

The AU-106 may be used as an Alarm unit (see p. 60).

Electrical characteristics	
Power supply voltage	110 V (optionally)/ 220 V, 50-60 Hz
Output voltage	18...31 VDC
Rated power	450 W
Pulsation	1 V
Rated load current	20 A
Terminals for connected loads	4
Galvanic isolation from power mains (for main power)	+

PS-103-20 dimensional drawing

PS-103-20 functional diagram

Power supply unit
PS-203

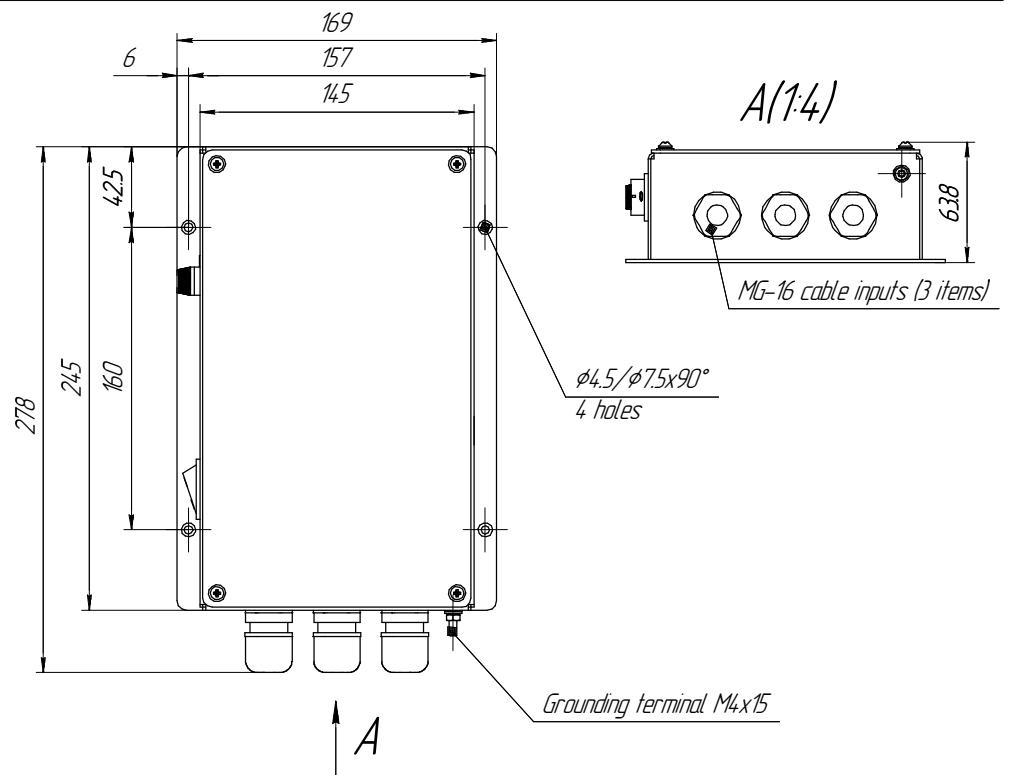

The PS-203 power supply unit operates with single-phase AC mains 50-60 Hz and converts the input voltage of 110/220VAC into 12/24/48VDC. The PS-203 supplies shipboard equipment which is sensitive to input voltage surges and peaks.

Install in a dry environment (IP22). The unit has a galvanic isolation of the input/output feed circuit and overvoltage protection.

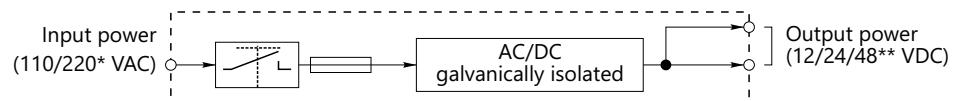

TECHNICAL CHARACTERISTICS

General characteristics	
IP rating	IP 22
Storage temperature	-60...+70°C
Operating temperature	-15...+55°C
Weight	5 kg
Overtoltage protection	+
Current overload protection	+

** Depending on design

PS-203 functional diagram

Power supply units

PS-203-40A(60A)

The PS-203-40A and PS-203-60A power supply units with a rated power of 1000 and 1512 W are designed to operate with 110/220VAC and convert the input voltage into a regulated 24VDC. Both power supply units have an input for a standby storage battery (24 VDC), which switches over automatically in the event of a power supply failure. A power failure actuates the closing of the built-in dry relay contacts. The units are suitable to supply shipboard equipment, which is sensitive to input voltage surges and peaks.

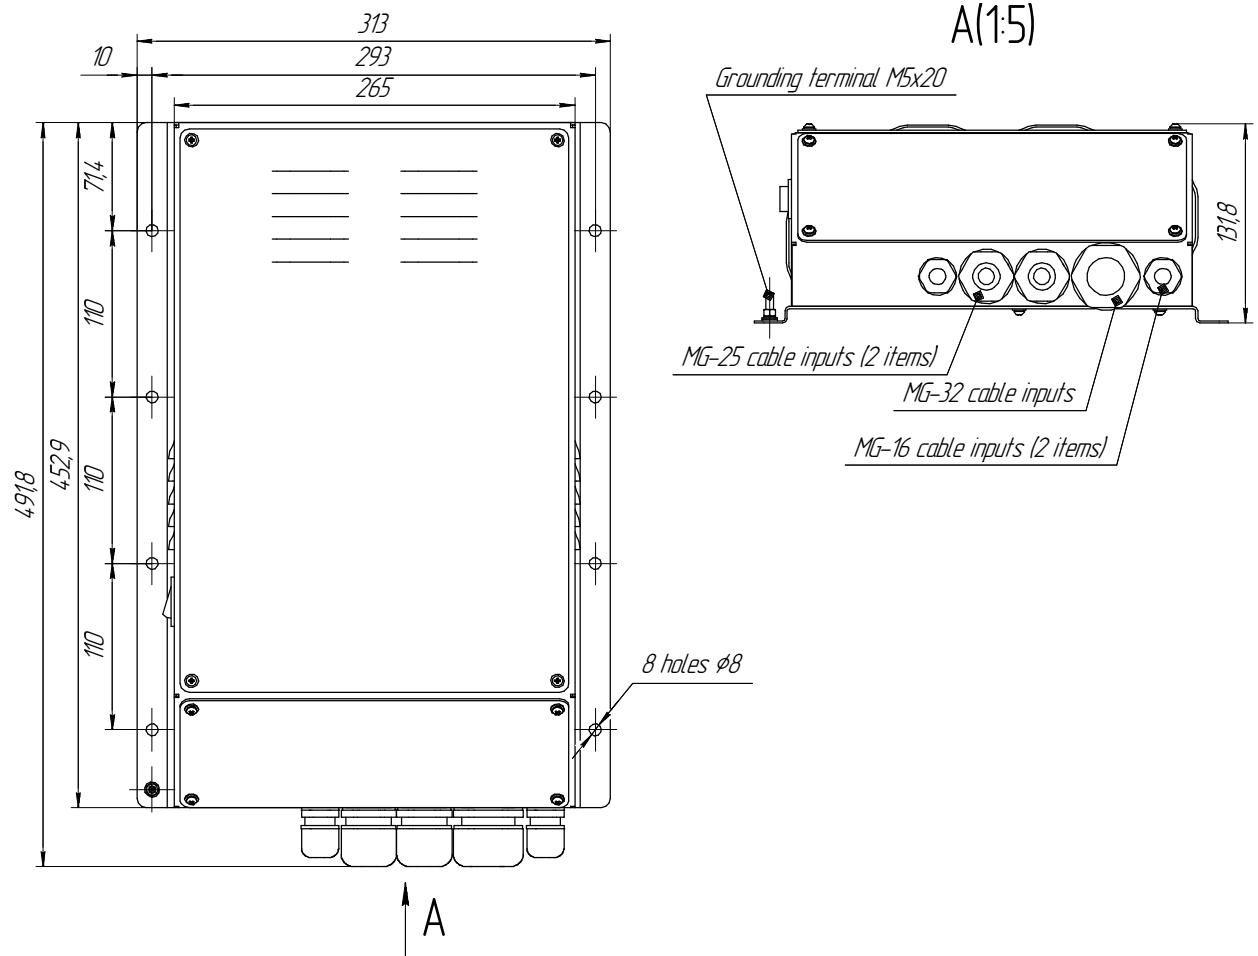

The PS-203-40A (60A) can be used in a dry environment (IP22). The units have galvanic isolation of input/output feed circuit, overvoltage and current overload protection.

TECHNICAL CHARACTERISTICS

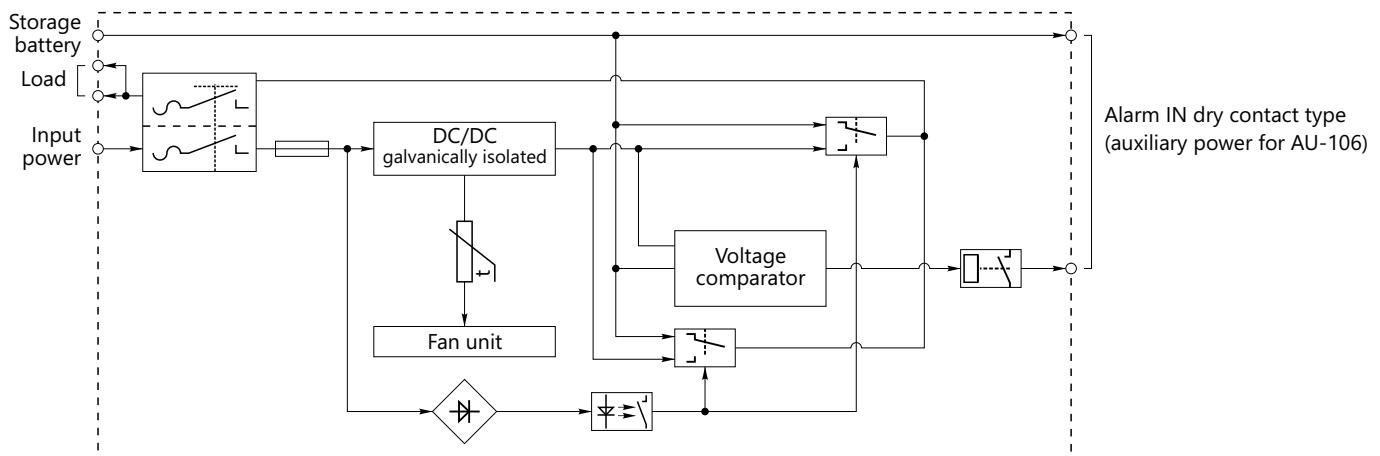

General characteristics	
IP rating	IP 22
Storage temperature	-60...+70°C
Operating temperature	-15...+55°C
Weight	15 kg
Degree of efficiency	up to 90%

PS-303 functional diagram

Automatic battery charger **CH-105**

The CH-105 automatic battery charger operates with single-phase mains of 50-60 Hz 110/220 VAC or 24 VDC, depending on the design. It is used to charge different storage batteries automatically, providing a max output power of 600 W and an output to connect load.

The unit is equipped with a built-in control and indication panel to set the charging modes and display the storage battery status. The CH-105 can be optionally equipped with the external control panel BCP-136.

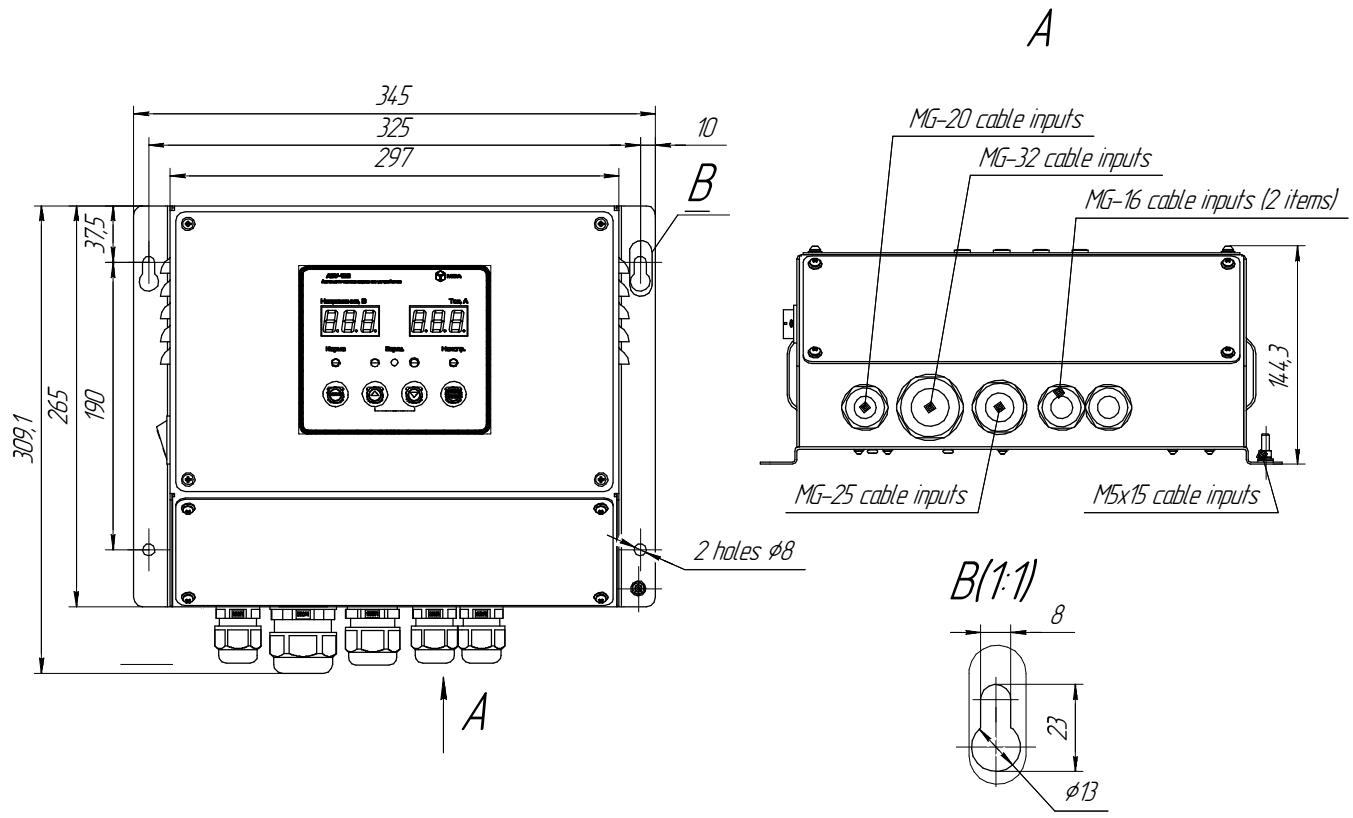

Install in a dry environment (IP22). The device has a reverse polarity protection of the main power and storage battery, and a current overload protection. Deep discharge and overheat protection are optional (provided that the thermal sensor DTS-135 is used).

TECHNICAL CHARACTERISTICS

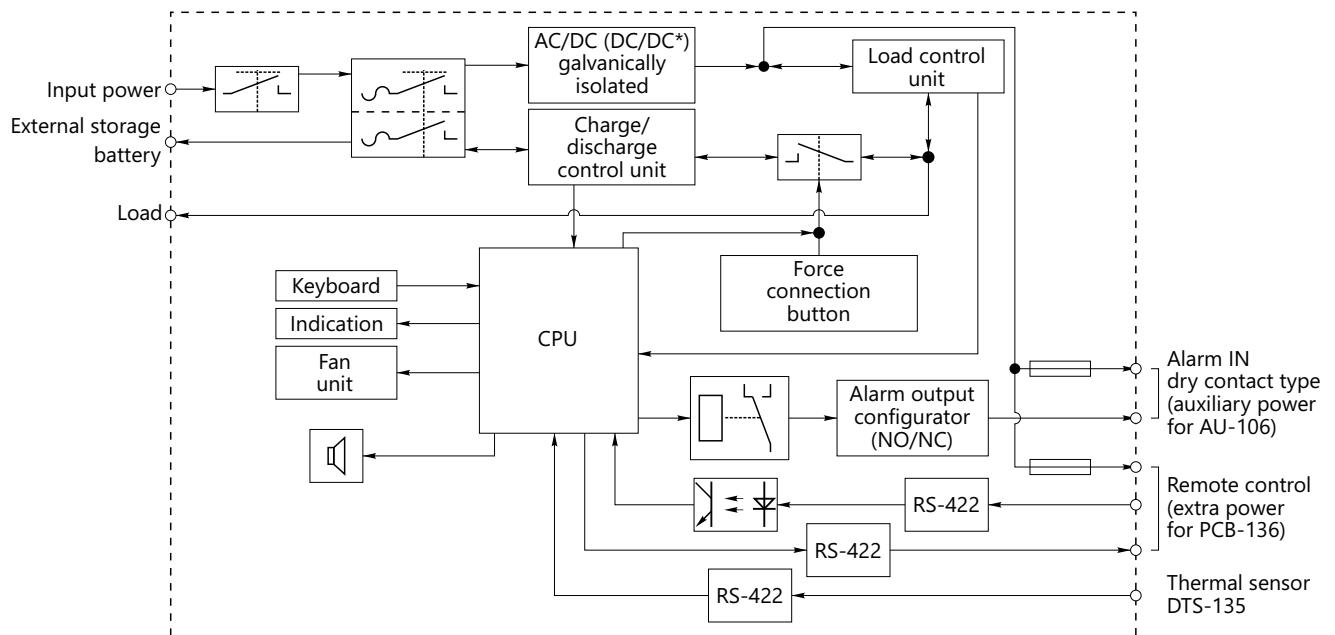

Electrical characteristics					
Design	CH-105	CH-105-24	CH-105-2412A	CH-105-110 VDC	CH-105-220 VDC
Power supply voltage	~110/220 V, 50/60 Hz		24 VDC (19...72 V)	110 VDC	220 VDC
Maximum output power	600 W	500 W	350 W	500 W	420 W
Charge current	1...20 A	1...16 A	1...12 A	1...16 A	1...14 A

Storage temperature	-60...+70°C
Operating temperature	-15...+55°C
Weight	7 kg

Built-in protection:
- reverse polarity;
- power loss;
- excessive current in battery circuit (overload / short-circuit);
- reverse polarity battery connection;
- deep discharge (optional);
- overheating (combined with the thermal sensor DTS-135).

CH-105 dimensional drawing

*Design with DC input is optional

CH-105 functional diagram

Power supply / Automatic battery charger
PCH-205

The PCH-205 power supply / automatic battery charger is designed to operate with single-phase mains 50-60 Hz 110/220VAC and provide 24VDC to shipborne systems and other industrial equipment with a total capacity of up to 1000 W. Combined with power supply, the PCH-205 charges connected storage batteries automatically. In case of a main power failure the unit switches the load to the storage battery automatically.

Two options are available for the PCH-205:

Option 1: a built-in control and indication panel, providing charge mode settings and battery status display (see Functional diagram).

Option 2: basic design w/o a built-in control (see Dimensional drawing). The device can be optionally equipped with the external battery control panel BCP-136.

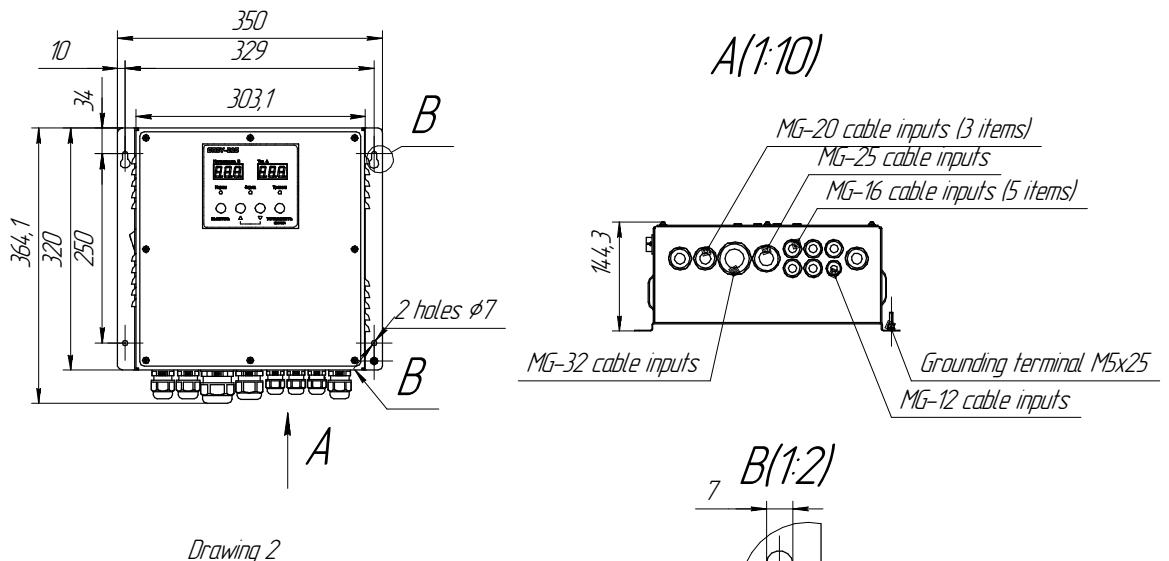

The PCH-205 shall be installed in a dry environment (IP22). It has a power supply and SB mains reverse polarity protection, current overload protection in the battery and load circuit. Deep discharge protection. The thermal sensor DTS-135 allows for controlling the battery temperature on the PCH-205 screen (see Functional diagram).

TECHNICAL CHARACTERISTICS

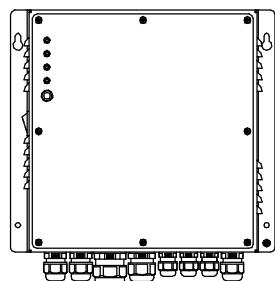

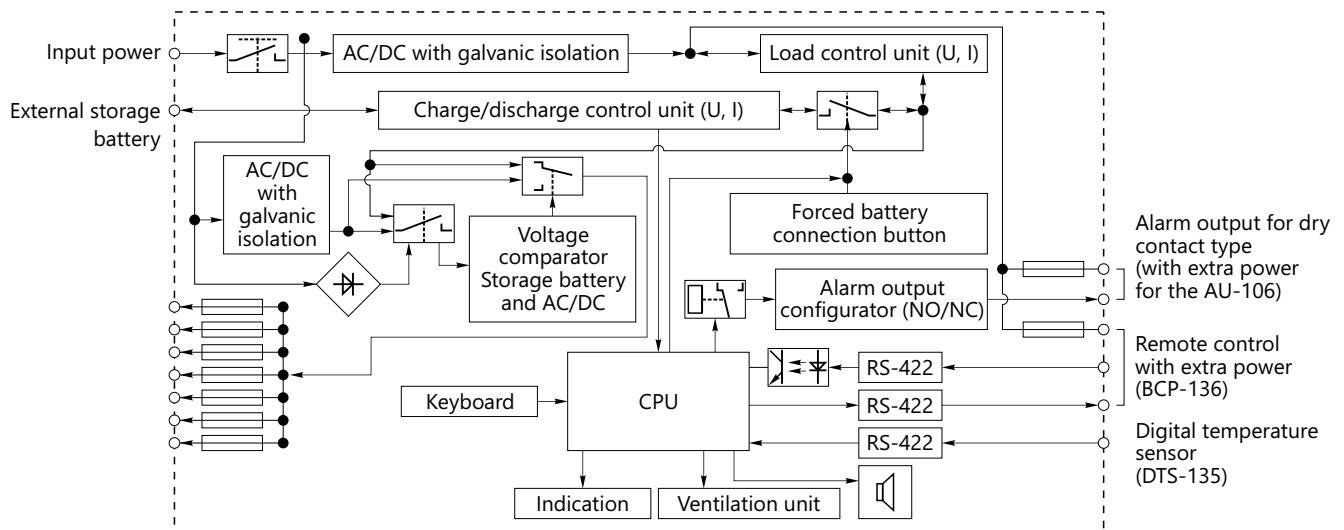

General characteristics		Electrical characteristics		
Parameter	Value	Built-in power supply unit	Built-in charge unit	
IP rating	IP 22			
Storage temperature	-60...+70°C			
Operating temperature	-15...+55°C			
Weight	7 kg			
Parameter		Power supply voltage	Output voltage	Output current
		110/220 V, 50-60 Hz	24 VDC regulated	40 A
				20 A (basic design)*
				600 W
				24 V, up to 200 A·h
				10 hours up to 80% capacity
				1 pc. (to connect the battery)

*In Functional diagram, with the BCP-136 the charging voltage can be set within 9-30 V, charging current within 0.2-20 A.

Drawing 1

Drawing 2

**PCH-205 dimensional drawing**

DC/DC converter
DC-108

The DC-108 operates with the mains of 12/24/110 VDC and converts the input voltage into a regulated 12/24 VDC, required to protect equipment, which is sensitive to input voltage surges and peaks.

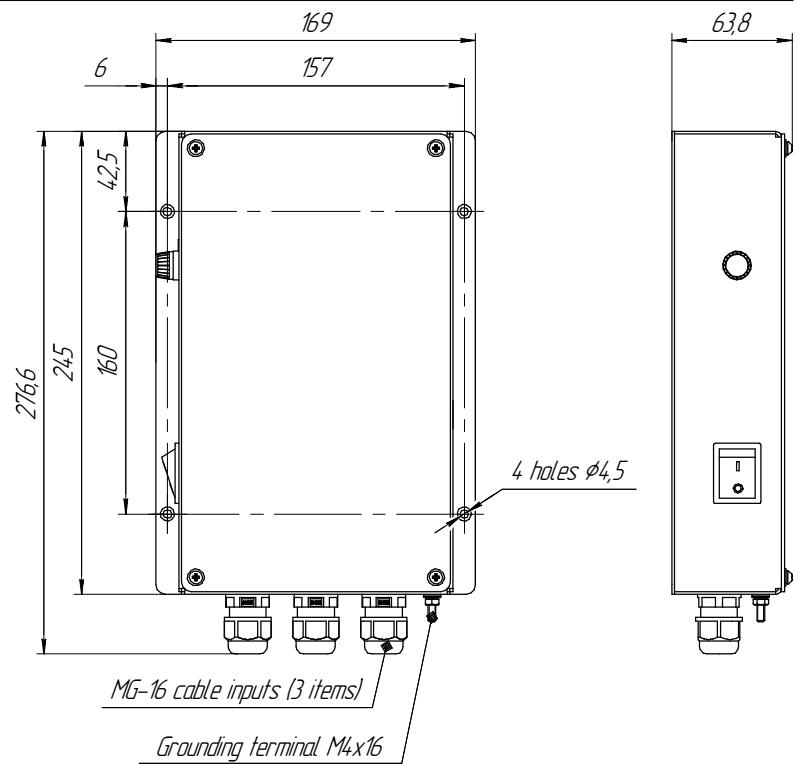

The unit has a galvanic isolation between the supply mains and the load, reverse polarity, overvoltage and overload protection. Dry environment installation (IP22).

TECHNICAL CHARACTERISTICS

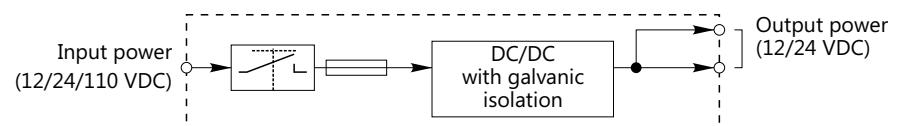

General characteristics	
IP rating	IP 22
Storage temperature	-60...+70°C
Operating temperature	-15...+55°C
Weight	1.9 kg

Name	Power supply voltage	Output voltage	Output power	Max output current	Power consumption (max)	Degree of efficiency

DC-108 (24/24-150)	24 (19...36) VDC			6.3 A		77%
DC-108 (96/24-150)	110 (72...144) VDC ~110 V, 50/60 Hz					82%

The DC-108 can be optionally designed with various power and voltage.

DC-108 dimensional drawing

* depending on the version

DC-108 functional diagram

DC/DC converter

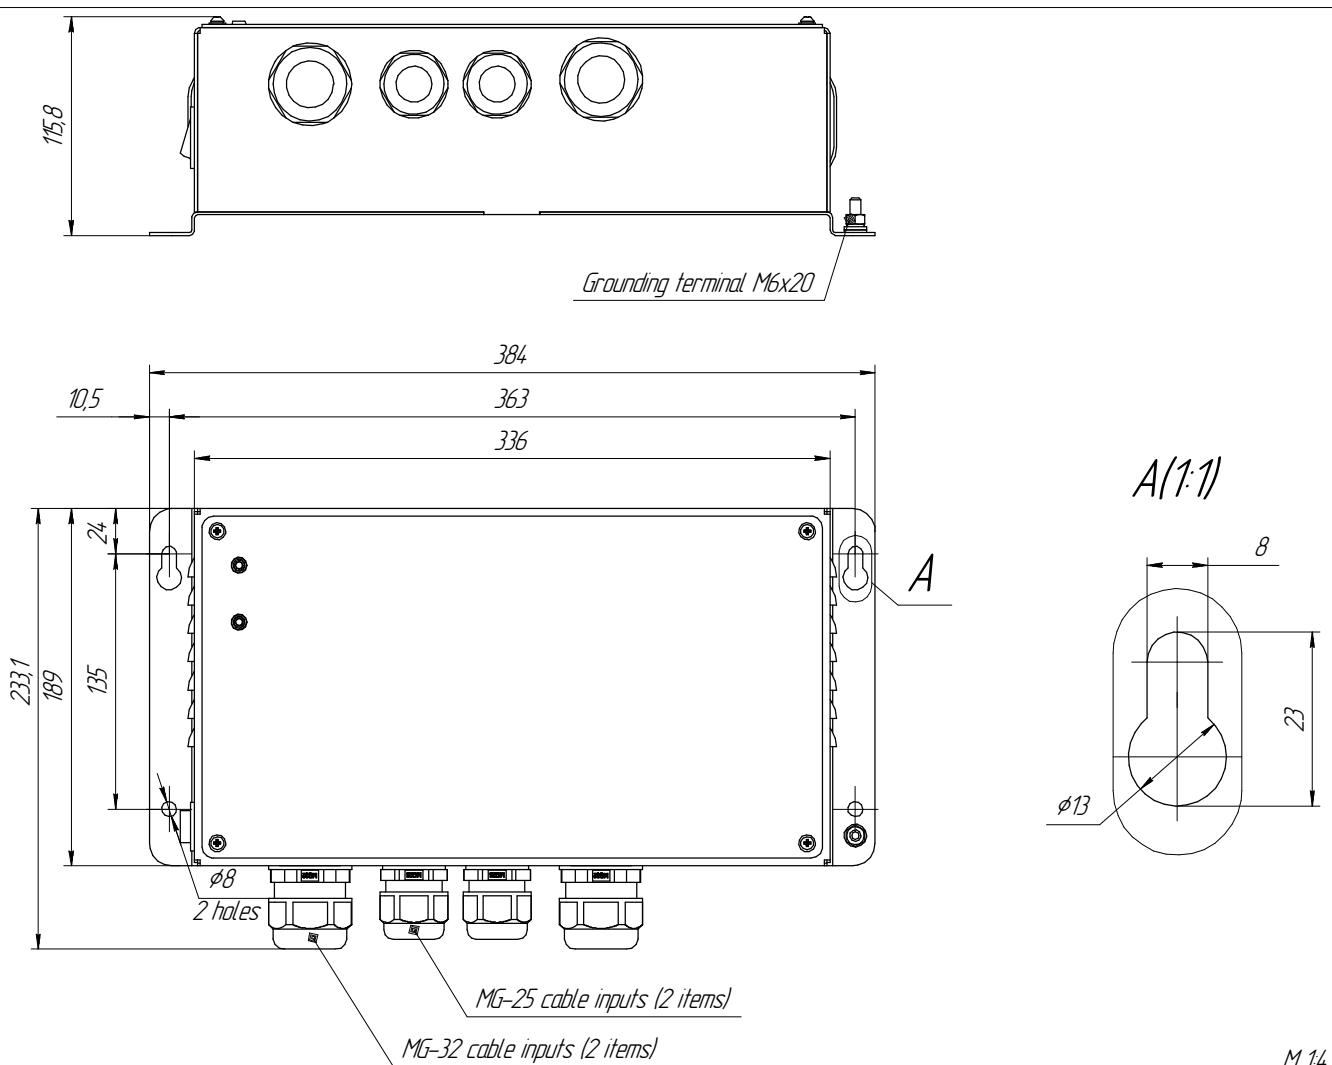

DC-108-1000

The DC-108-1000 operates with the mains of 24 VDC, converts the input voltage into a regulated VDC and protects electronic equipment against input voltage surges and peaks. The rated power is 960 W.

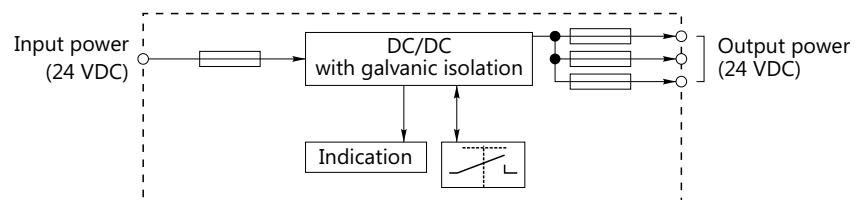

The unit has a galvanic isolation between the power mains and load, reverse polarity, overvoltage and overload protection by input circuit. Dry environment installation (IP22).

TECHNICAL CHARACTERISTICS

General characteristics		Electrical characteristics	
IP rating	IP 22	Power supply voltage	19 - 36 VDC

Power supply unit (built-in storage battery)

BPS-114

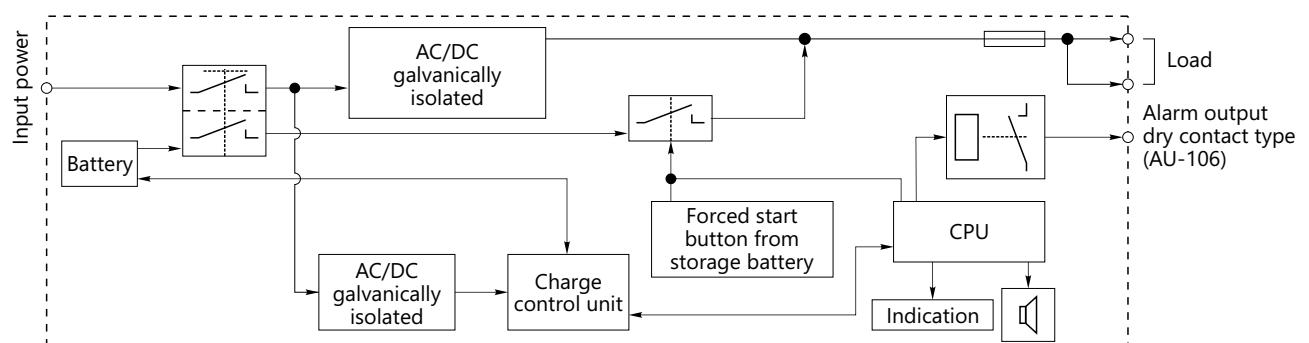

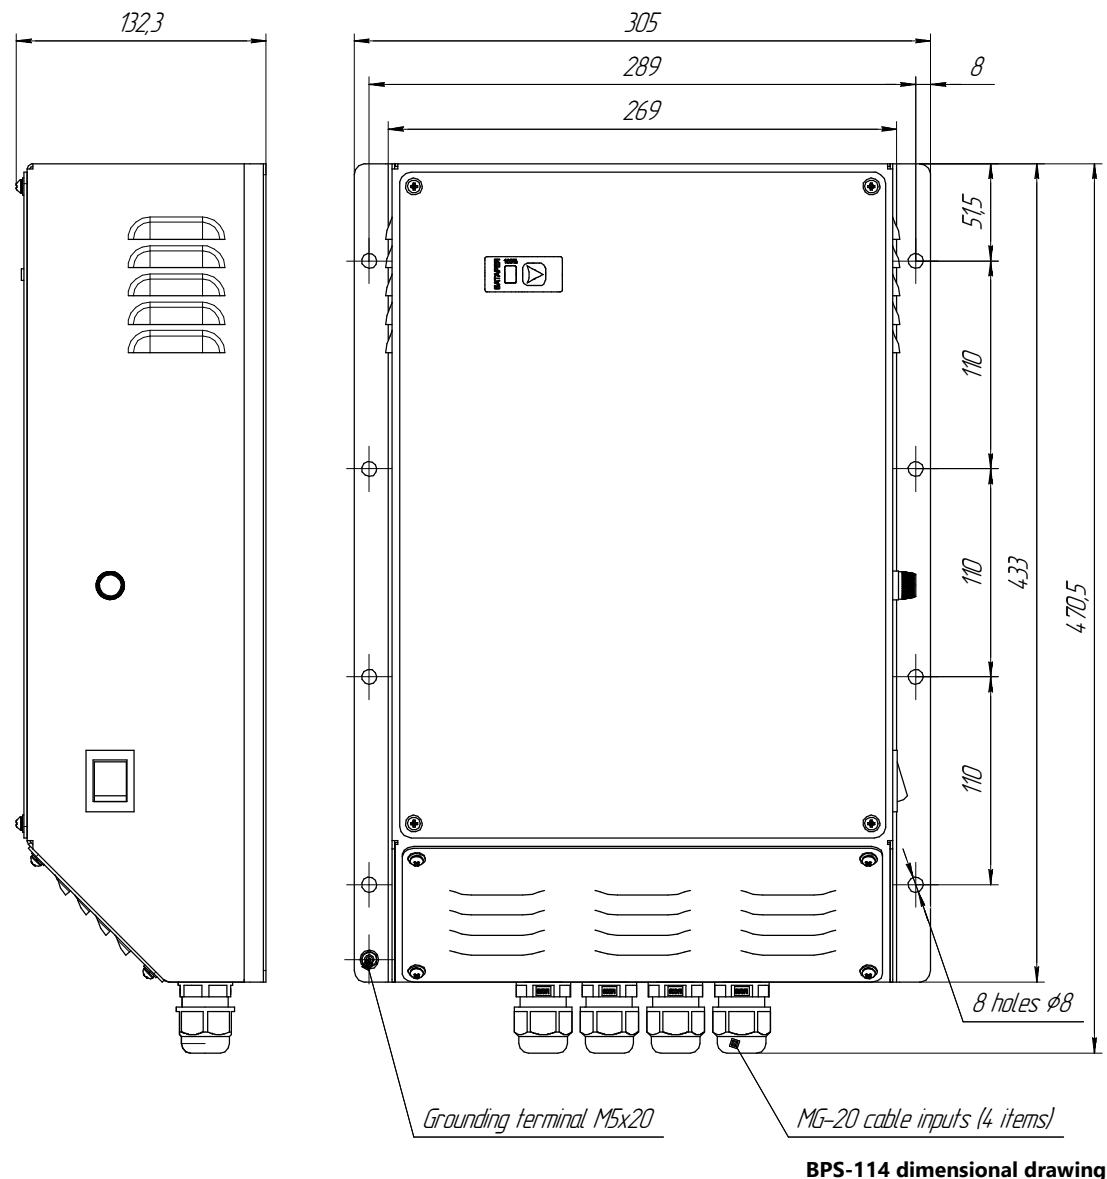

The BPS-114 uninterruptable power supply unit with a maximum rated power 200 W is designed to operate with single-phase mains of 50-60 Hz 110/220 VAC and to provide uninterrupted power to equipment with an input voltage of 12 VDC. The unit has a built-in storage battery with automatic switch over in case of a power supply failure. A power failure actuates the closing of built-in dry relay contacts and triggers a sound/light alarm. A current charge level and power level indicators are on the front panel.

The BPS-114 has a galvanic isolation between the power mains/load and current overload protection. Installation in a dry environment (IP22).

TECHNICAL CHARACTERISTICS

General characteristics	
IP rating	IP 22
Storage temperature	-60...+70°C
Operating temperature	-15...+55°C
Weight	10 kg

Electrical characteristics	
Power supply voltage	~110/220 V, 50/60 Hz
Output voltage (operation from the mains)	13.5 VDC
Output voltage (operation from the battery)	9.5...14 VDC
Output power	160 W
Max operation time from the battery under load 10 A	not less than 60 minutes
Tripping current	20 A
Efficiency	up to 84%
Terminals to connect loads	2
Battery	sealed lead acid battery, maintenance-free, 12V (20 A·h)

Power supply unit (built-in storage battery)

BPS-114-24

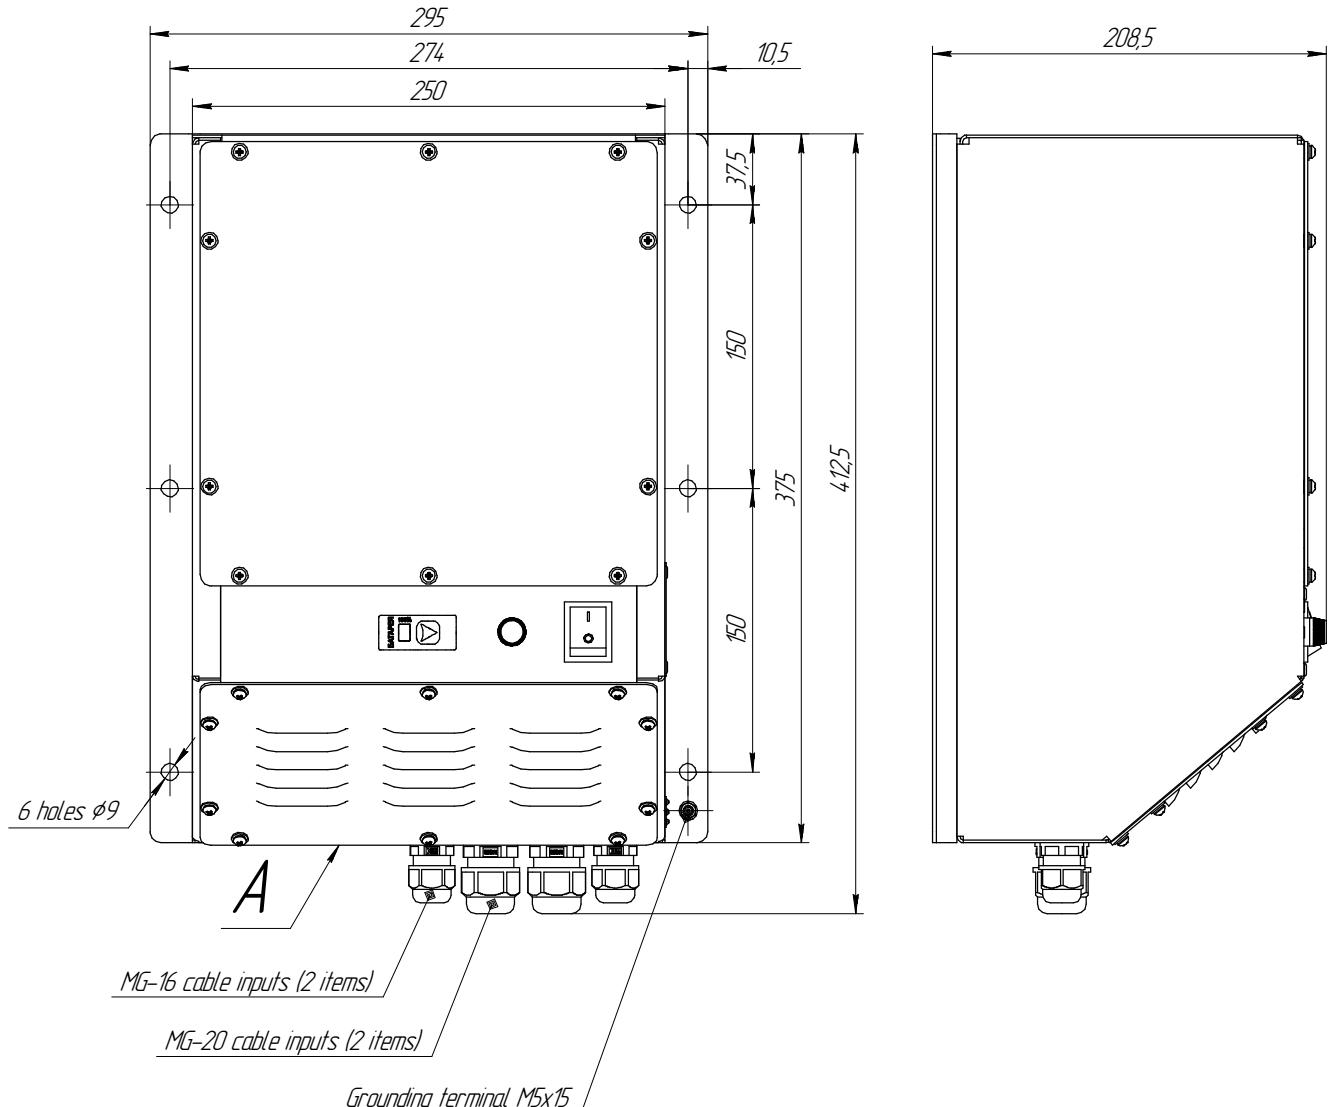

The BPS-114-24 uninterruptable power supply unit with maximum rated power 320 W is designed to operate with single-phase mains of 50-60 Hz 110/220 VAC and to provide uninterrupted power supply to equipment with an input voltage of 24 VDC. The unit has a built-in storage battery with automatic switch over in the event of a power supply failure. A power failure actuates the closing of built-in dry relay contacts, and a sound/light alarm is triggered. Current charge level and power load indicators are on the front panel.

The BPS-114-24 has a galvanic isolation between the power mains / load and current overload protection. Dry environment installation (IP22).

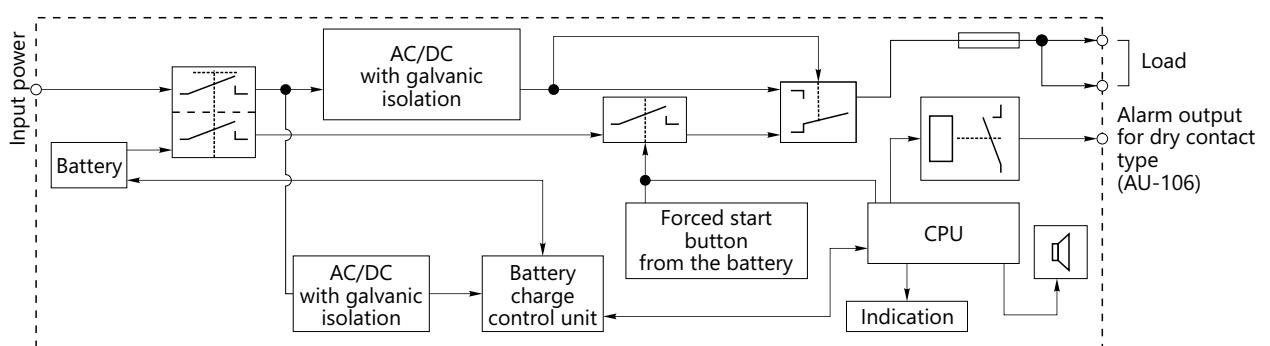

TECHNICAL CHARACTERISTICS

General characteristics	
IP rating	IP 22
Storage temperature	-60...+70°C
Operating temperature	-15...+55°C
Weight	21.7 kg

Electrical characteristics	
Power supply voltage	~110/220 V, 50/60 Hz
Output voltage (operation from the mains)	28.4 VDC
Output voltage (operation from the battery)	19.2...28 VDC
Output power	320 W
Max operation time from the battery under load 10 A	not less than 60 minutes
Efficiency	87%
Terminals to connect loads	2
Battery	sealed lead acid battery, maintenance-free, 2x12 V (20 A·h)

BPS-114 dimensional drawing

BPS-114 functional diagram

Battery control panel **BPC-136**

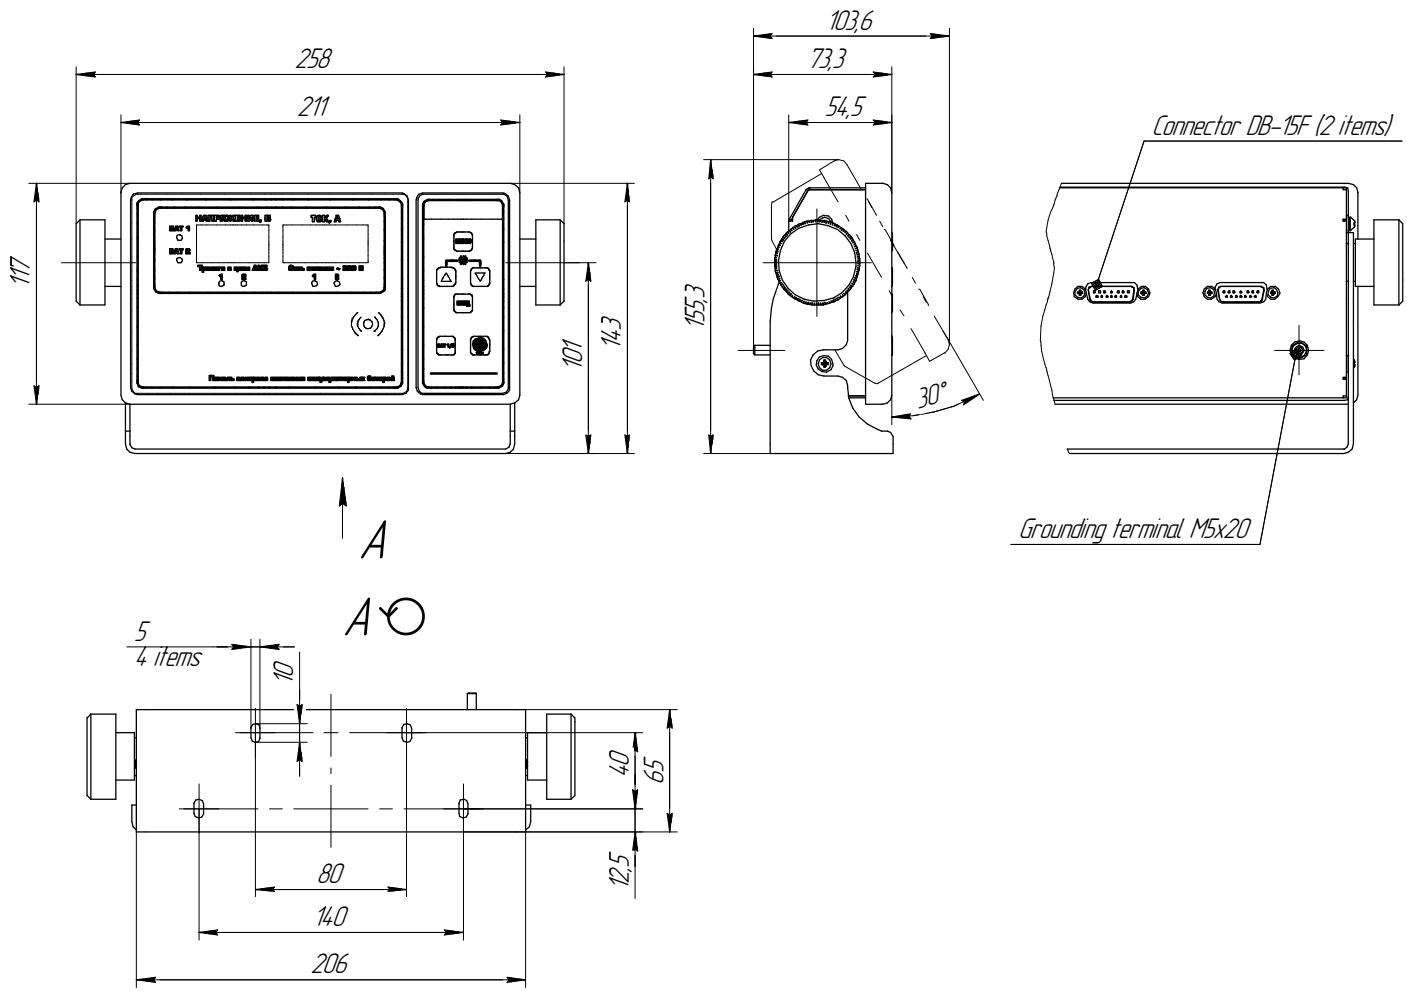

The BCP-136 allows remote setting of power supply units/battery chargers CH-105 and PCH-205. The device controls the status of connected storage batteries, indicating current charge/discharge and voltage data. In case of a power voltage failure and battery discharge the BCP-136 triggers sound and light alarm.

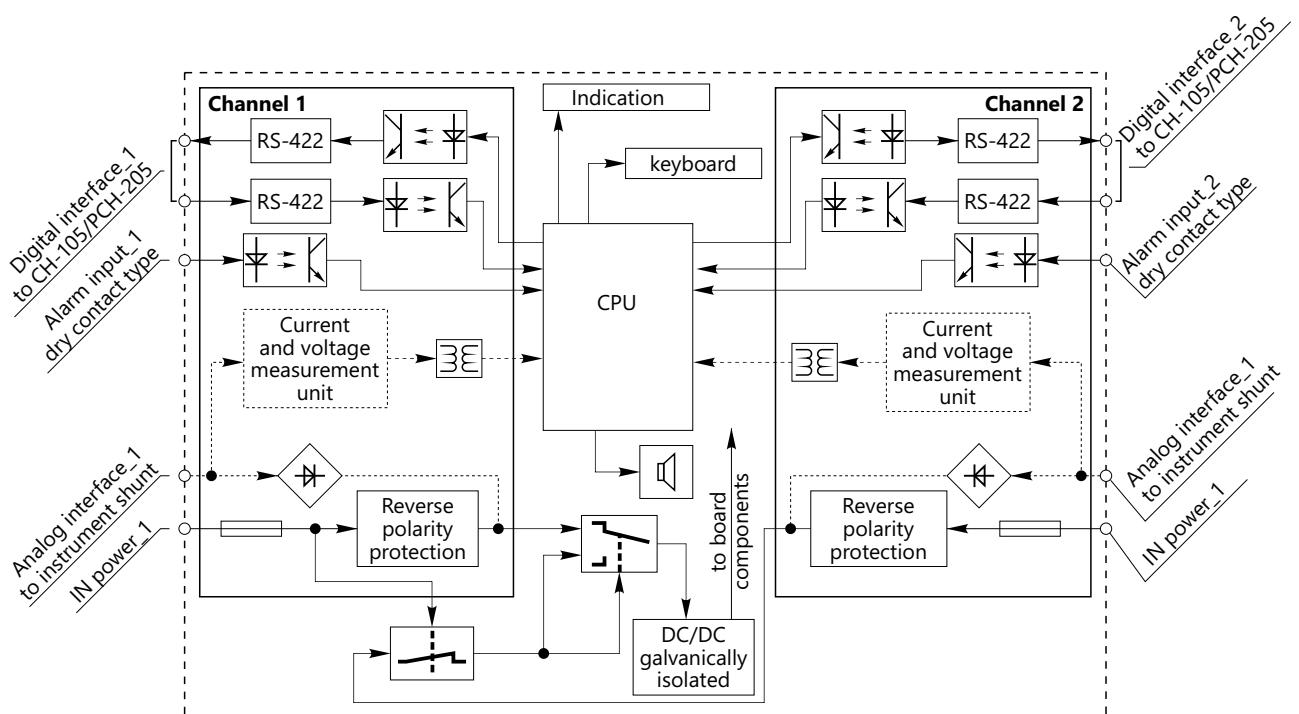

Install in a dry environment (IP22).

TECHNICAL CHARACTERISTICS

General characteristics		Characteristics of digital interface	
IP rating	IP 22	Number of input ports	2
Storage temperature	-60...+70°C	Supported interfaces	RS-422
Operating temperature	-15...+55°C	Max receive rate	115200 bit/s
Weight	2 kg	Galvanic isolation	+
Electrical characteristics		Characteristics of analog interface	
Power supply voltage	10...36 VDC	Number of input ports	2
Power consumption	2.5 W	Galvanic isolation of input ports	+
Galvanic isolation from supply mains	+	Measuring range Uresistor	80 mV
Reverse polarity protection	+	Measuring range Ubattery	0...36 V
Oversupply protection	+	Current measurement accuracy	0.1 A (format XX.X)
Galvanic isolation	+	Voltage measurement accuracy	0.1 V (format XX.X)
		Input resistance	0.8 MOhm

BPC-136 dimensional drawing

BPC-136 functional diagram

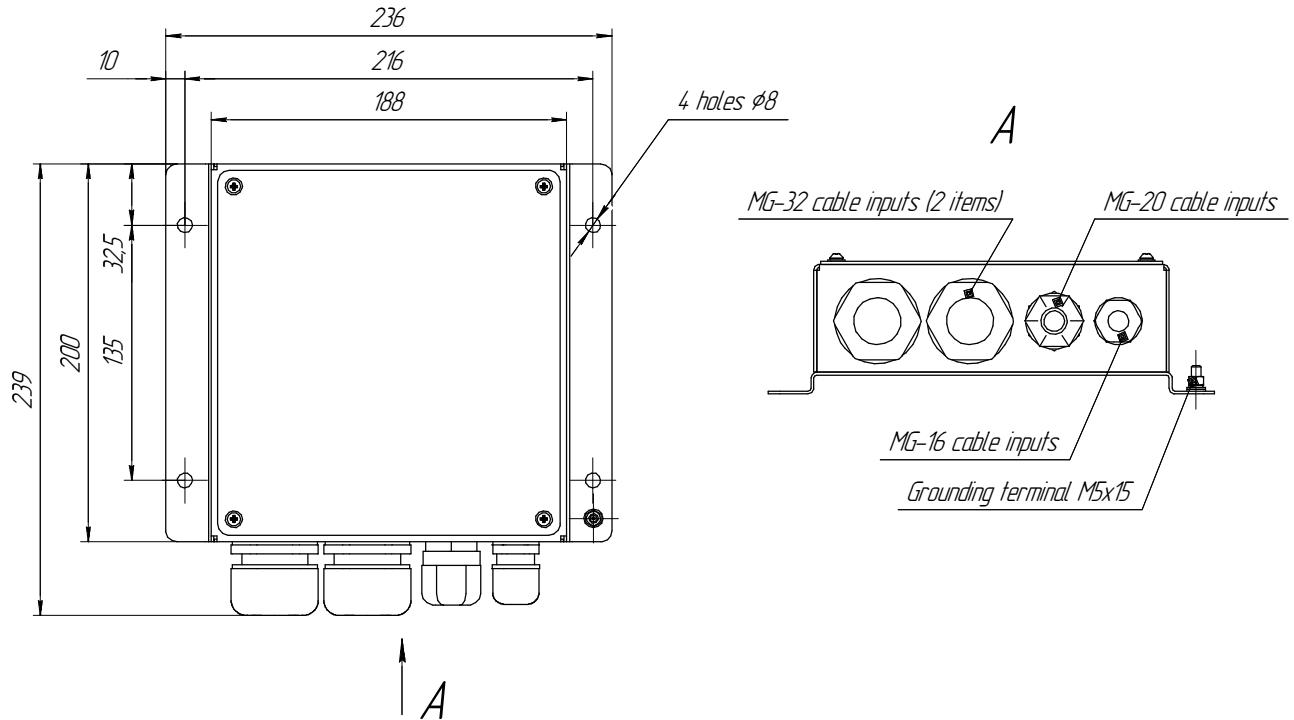

Battery power measurement unit
BMU-126

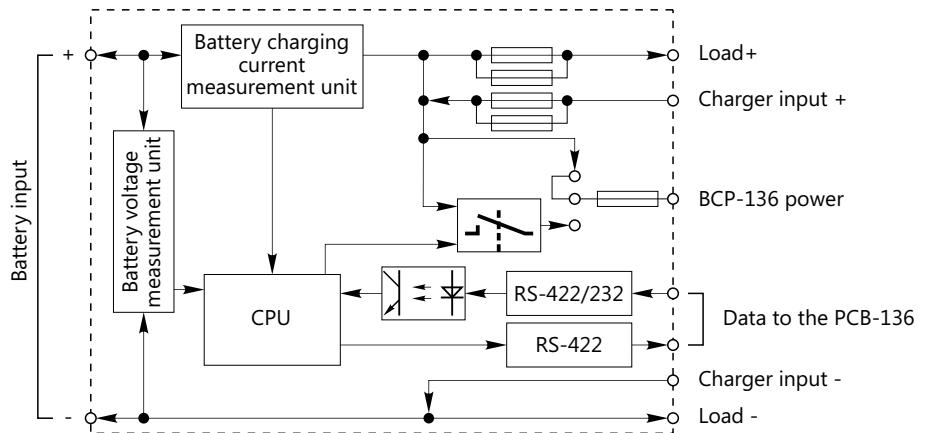

The BMU-126 reads the actual current and voltage data of a storage battery. Charge/discharge current and voltage may be controlled remotely using third-party devices. Readings are transmitted to the BCP-136 battery control panel via an RS-422 interface.

TECHNICAL CHARACTERISTICS

General characteristics		Operating characteristics	
IP rating	IP 22	The accuracy of the measured values:	
Storage temperature	-60...+70°C	current	0.2 A
Operating temperature	-15...+55°C	voltage	0.1 V
Weight	1.5 kg	Max value of measured current	50 A
Electrical characteristics		Max value of measured voltage	36 V
Power supply voltage	9.5...36 VDC	Characteristics of outputs	
Power consumption	5 W	Number of output ports	1
Reverse polarity protection	+	Supported interfaces	RS-422
Overcurrent protection	+	Max receive rate	9600 bit/s
Galvanic isolation from power mains		+ (if powered from external source)	

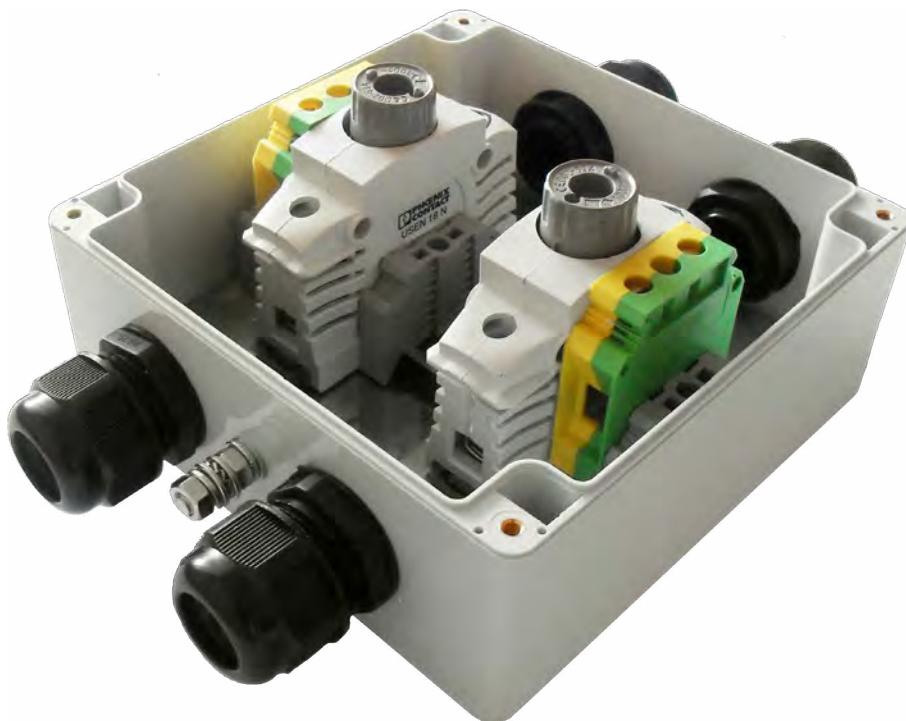

BMU-126 dimensional drawing

BMU-126 functional diagram

Fuse box

FB-137

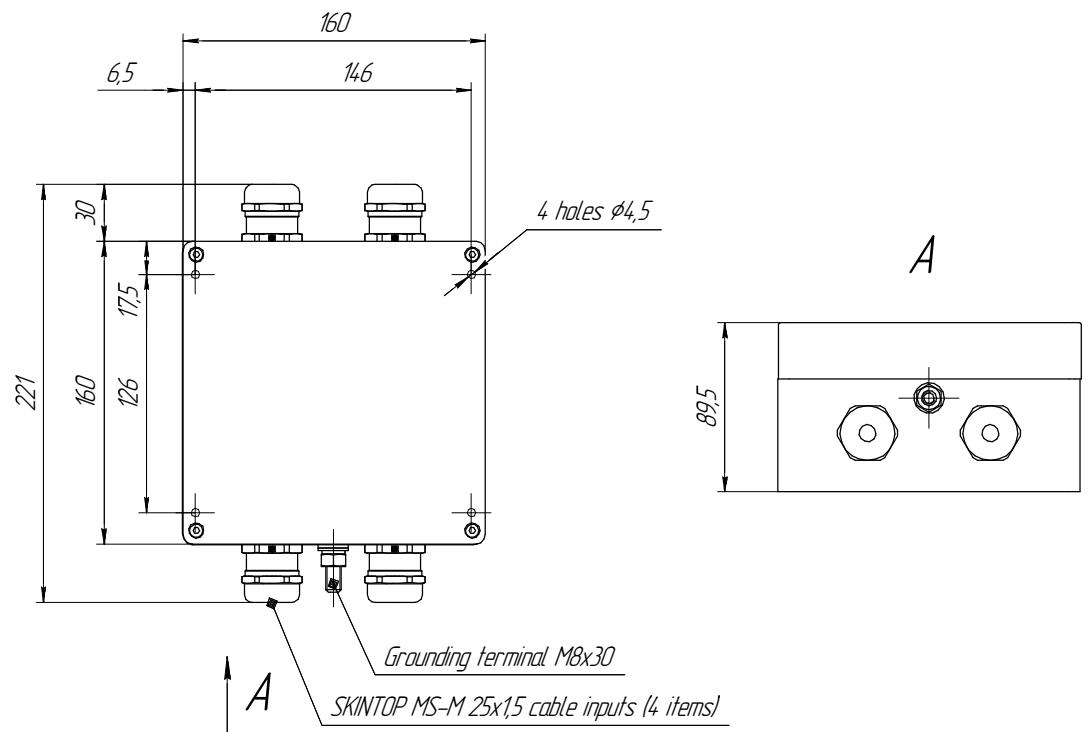

The FB-137 fuse box protects electric circuits and relevant elements from short circuit or overcurrent.

TECHNICAL CHARACTERISTICS

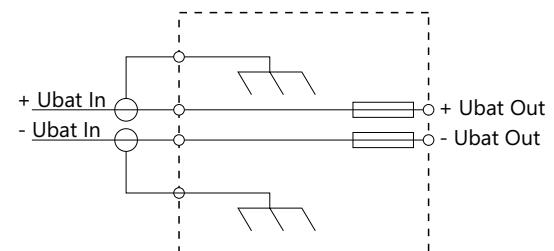

General characteristics	
IP rating	IP 65
Storage temperature	-60...+70 °C
Operating temperature	-40...+55 °C
Weight	1.5 kg

Electrical characteristics	
Max operating voltage	250 VDC or 400 VAC
Rated current	50 A*

* fuse rating may be changed on request.

FB-137 dimensional drawing

FB-137 functional diagram

Junction box
KP-124

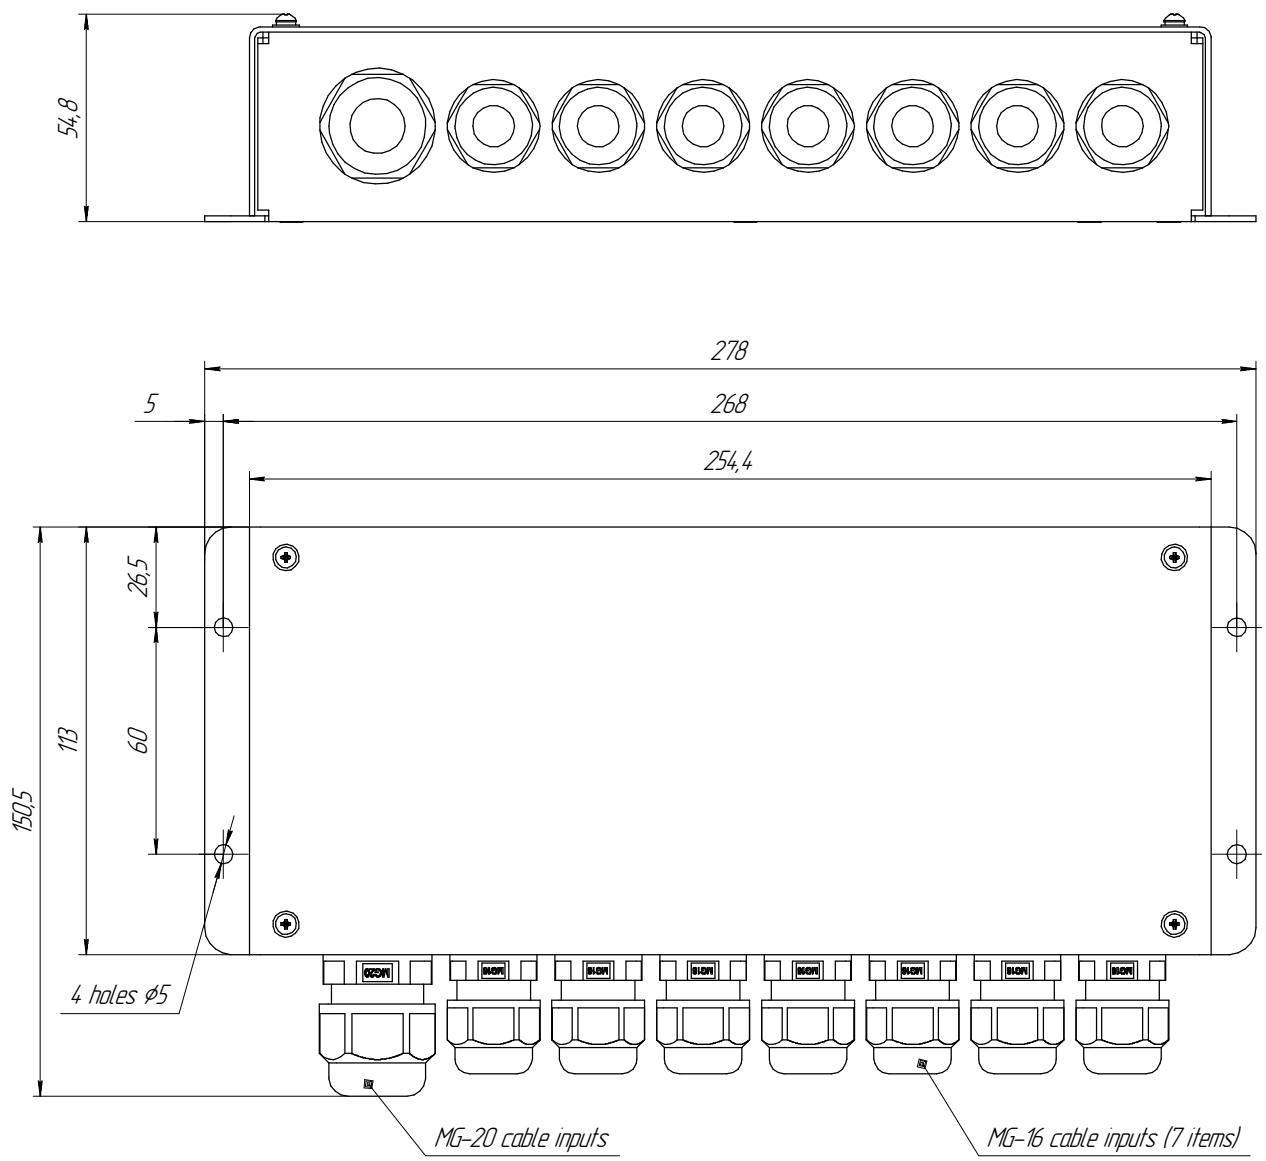

The KP-124 junction box connects several users to a single feed circuit; designed for installation in a dry environment (IP22).

TECHNICAL CHARACTERISTICS

General characteristics	
IP rating	IP 22
Storage temperature	-60...+70°C
Operating temperature	-20...+55°C
Weight	1.5 kg

Electrical characteristics			
Design	KP-124	KP-124P	KP-124S
Total number of terminals		8	
Terminals to connect users		7	
Contacts in terminal	6	3	3
Max permissible voltage		250 V	
Max permissible current	5 A	20 A	10 A

KP-124 dimensional drawing

VHF-interface (to connect VDR/SVDR)

VI-116

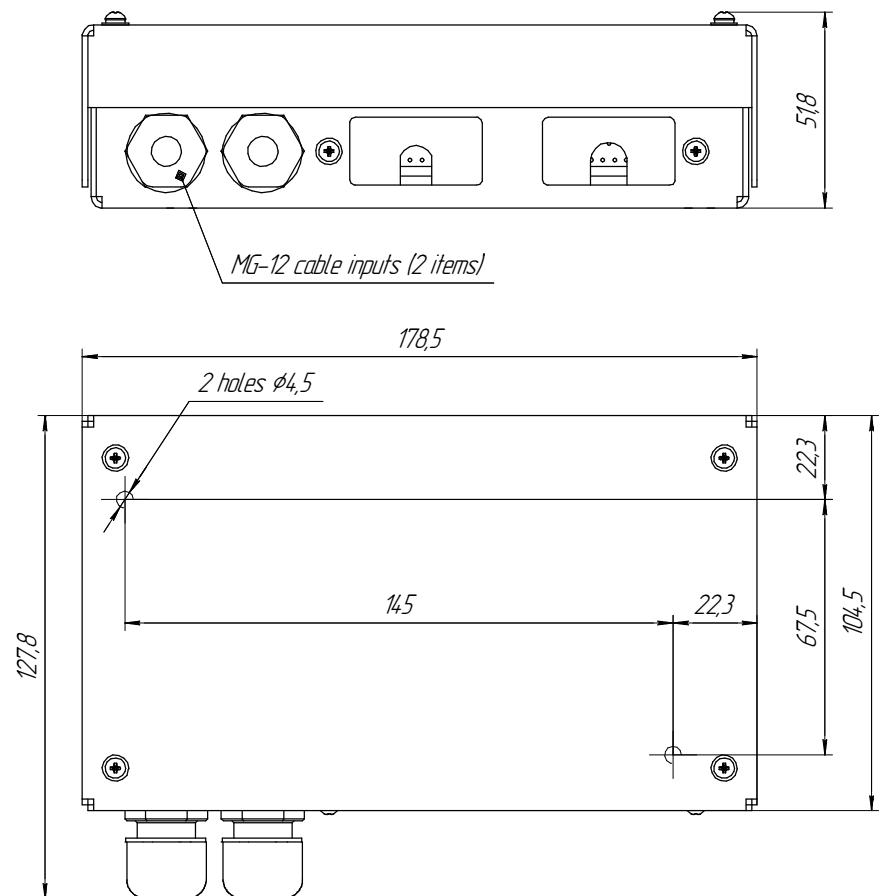

The VI-116 is designed to interface voyage data recorders or simplified voyage data recorders with VHF-radio stations like Sailor RT-2048 (Debeg 6348, Husun 2048), Sailor RT-4822 (Debeg 6322, Husun 4822, Sperry 4822, Scanti VHF 1000 DSC) or Furuno FM-8500.

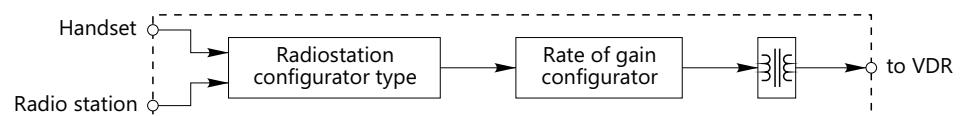

TECHNICAL CHARACTERISTICS

General characteristics	
IP rating	IP 22
Storage temperature	-60...+70 °C
Operating temperature	-15...+55 °C
Weight	1.1 kg

Electrical characteristics	
Power supply voltage	10...36 VDC
Power consumption	500 mW
Max power of analog output signal	100 mW
Max amplitude of analog output signal	10 V
Frequency bandwidth	100 Hz - 15 kHz

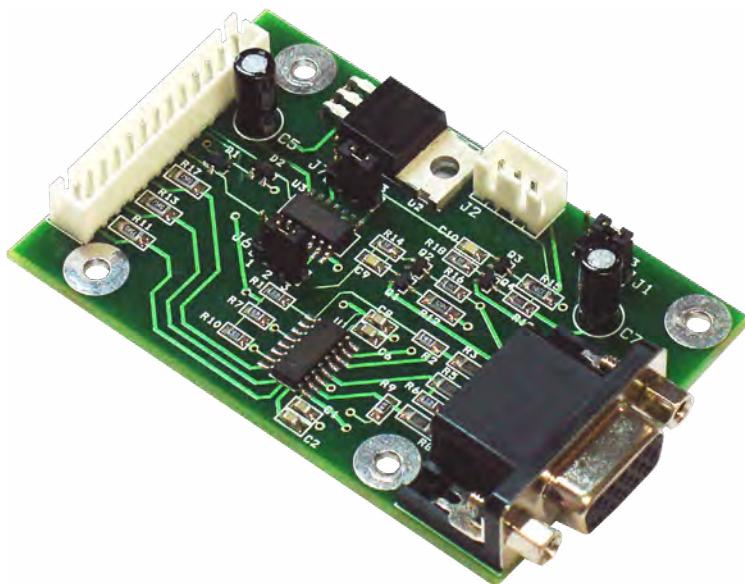

VI-116 dimensional drawing

VI-116 functional diagram

VGA-interface (to connect radar to VDR/SVDR)

VGA-119

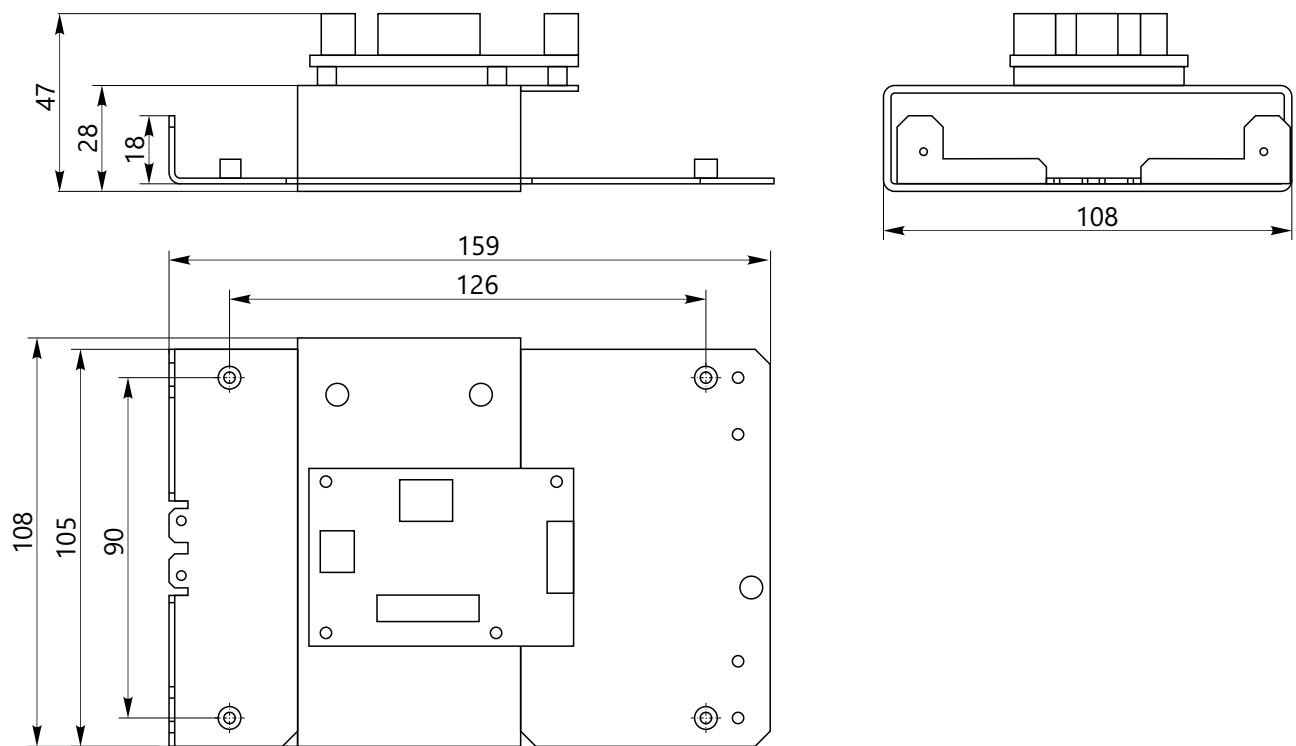

The VGA-119 connects VGA-radars and other devices to voyage data recorders or simplified voyage data recorders. The device provides amplification and jamming filtration of input VGA-signal, resolution up to 1600x1200.

Install in a dry environment (IP22).

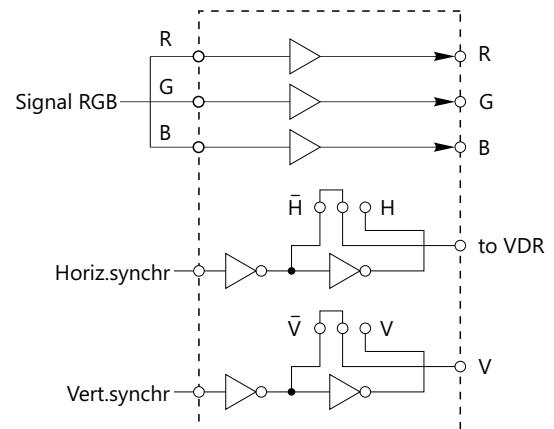

TECHNICAL CHARACTERISTICS

General characteristics	
Storage temperature	-60...+70°C
Operating temperature	-15...+55°C
Weight	0.4 kg

Electrical characteristics	
Power supply voltage	5 VDC
Max consumption current	300 mA
Max output load (per channel)	60 mA
Max vertical frequency	85 Hz
Max horizontal frequency	110 kHz
Max video resolution	1600 x 1200

VGA-119 dimensional drawing of bracket

VGA-119 functional diagram

Alarm unit

AU-106

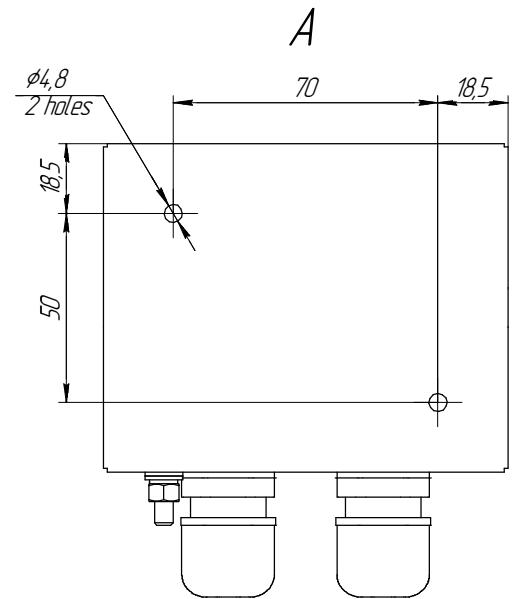

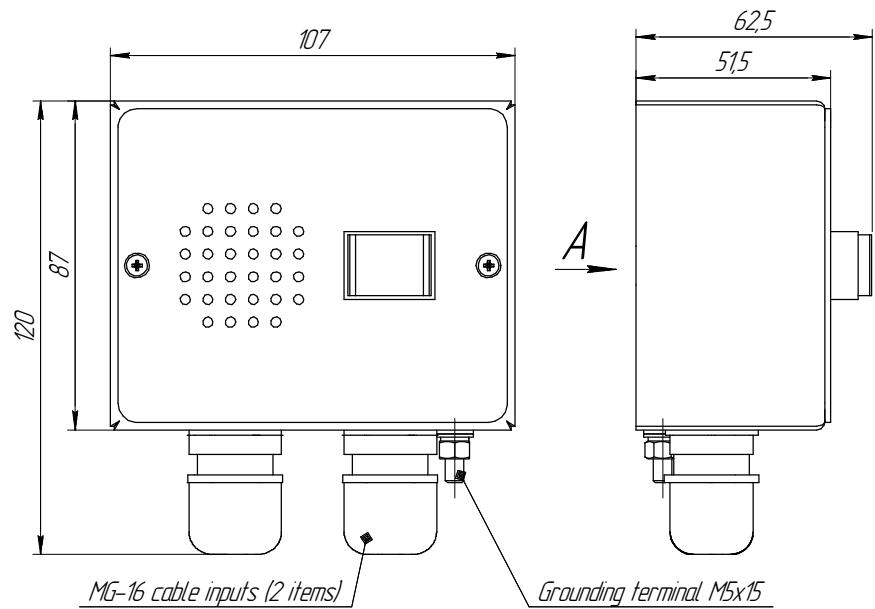

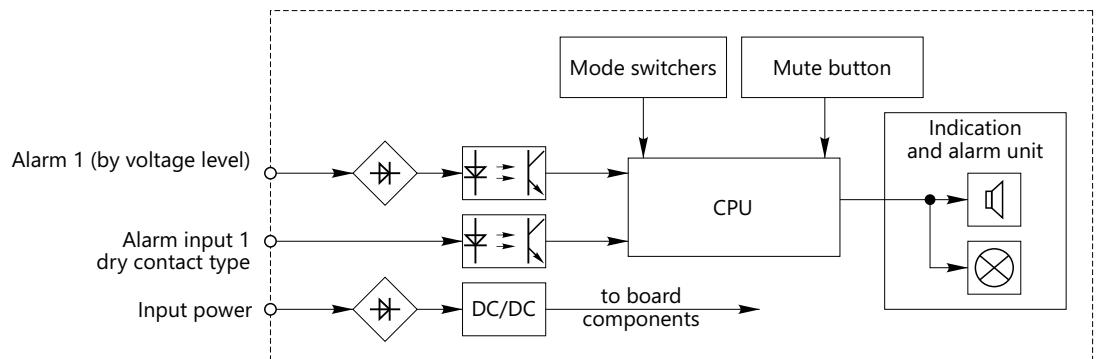

The AU-106 alarm unit provides a sound and visual signal, when triggered. The activation is ensured by closing (opening) dry contacts or voltage levels.

Install in a dry environment (IP22). The unit has a reverse polarity and overvoltage protection.

TECHNICAL CHARACTERISTICS

General characteristics	
IP rating	IP 22
Storage temperature	-60...+70°C
Operating temperature	-15...+55°C
Weight	0.435 kg

Electrical characteristics	
Power supply voltage	19...36 VDC
Consumption current	< 50 mA
Consumption current on the input «Relay»	< 2 mA
Voltage levels on the input «U»	5 / 12 / 24 / 110 / 220 V
Signaling units inputs	Dry relay contact Voltage level

AU-106 dimensional drawing

AU-106 functional diagram

Alarm unit

AU-206

The AU-206 alarm unit controls the activation of external alarms on up to five simultaneously connected devices, having a dry contact type output. Triggered at least on a single output, an alarm causes sound/visual signal and closing of "power" output contacts, where external alarm devices may be connected (e.g. lamps, loudspeakers, etc.).

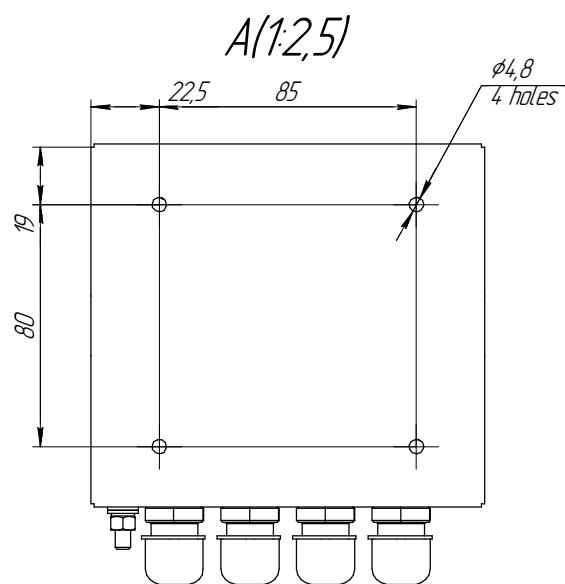

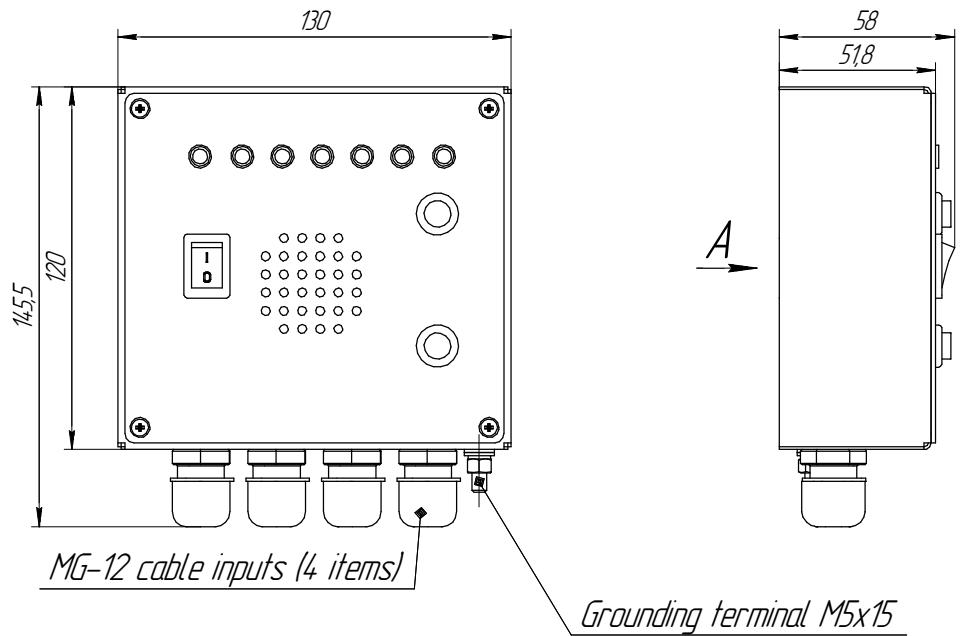

Install in a dry environment (IP22). The unit is provided with reverse polarity, current overload, overvoltage protection, and current overload protection on the "power" output.

TECHNICAL CHARACTERISTICS

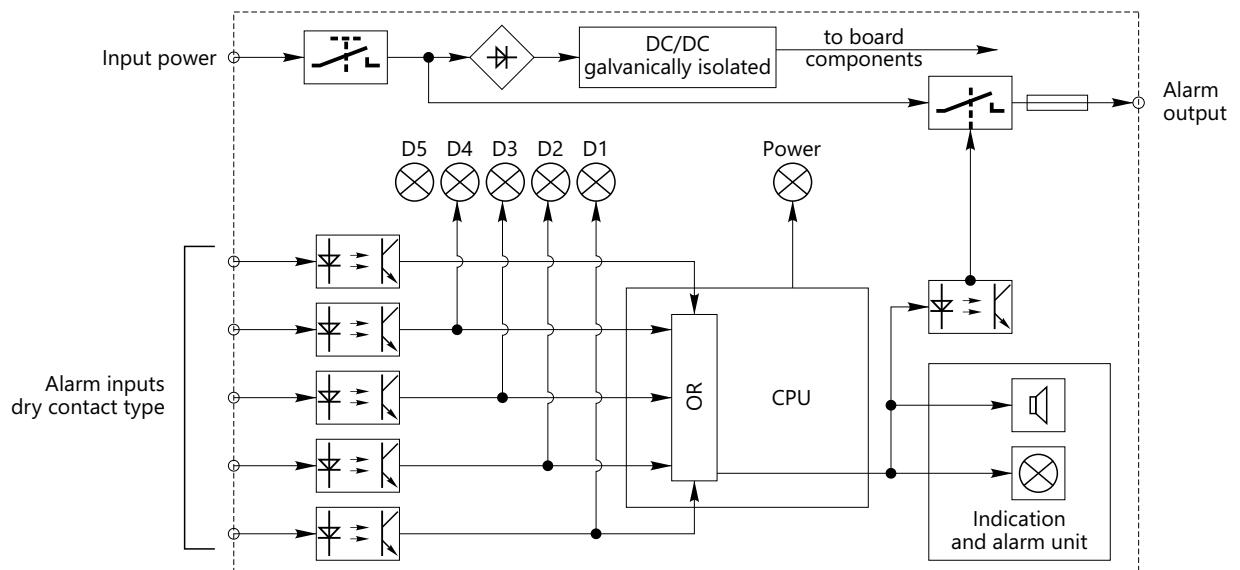

General characteristics	
IP rating	IP 22
Storage temperature	-60...+70°C
Operating temperature	-15...+55°C
Weight	0.8 kg

Electrical characteristics	
Power supply voltage	10...36 VDC
Maximum power consumption	3 W
Galvanic isolation from power mains	+
Reverse polarity protection	+
Overvoltage protection	+

Characteristics of inputs/outputs	
Numbers of inputs	5
Inputs type	Dry contacts opening sensor
Voltage on power output	Equal to power supply voltage

AU-206 dimensional drawing

AU-206 functional diagram

Dimmer

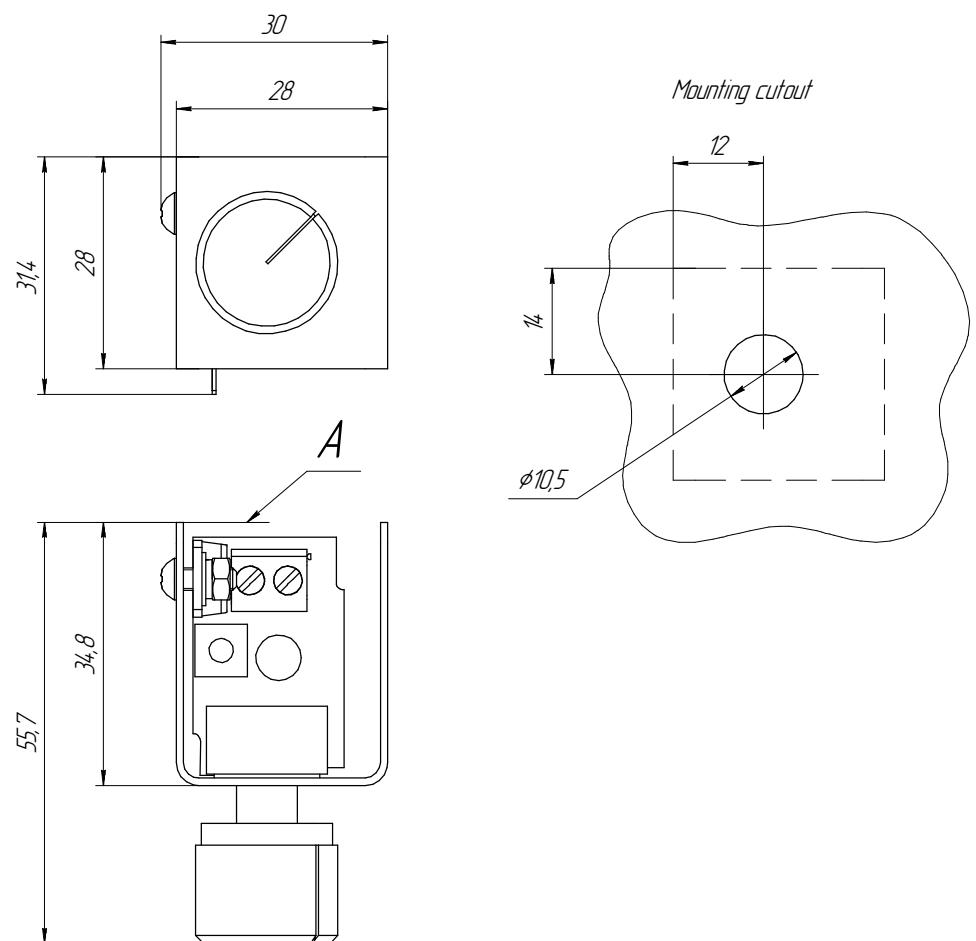

DM-107

The DM-107 dimmer is a low-voltage power regulator for DC circuits, designed for a smooth adjustment of load power by potentiometer rotation. The load may be resistive (lighting lamps, resistors, etc.) and inductive (solenoids, valves, engines, etc.).

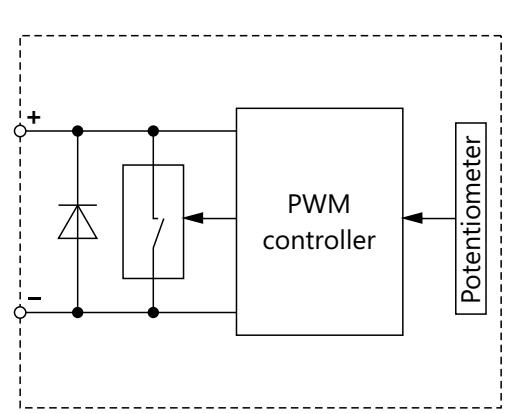

TECHNICAL CHARACTERISTICS

General characteristics	
Storage temperature	-60...+70 °C
Operating temperature	-15...+55 °C
Weight	0.12 kg

Electrical characteristics	
Operating voltage	18...36 VDC
Consumption current	1.1 mA
Connected load	resistive, inductive (except capacitive)
Max switching current	3.2 A
Regulated power	up to 100 W
Tuning range	0...90%
Limit of min power	0...50%
Operating frequency of PWM generator	200 ±20 Hz

DM-107 dimensional drawing

DM-107 functional diagram

Lamp **L-112**

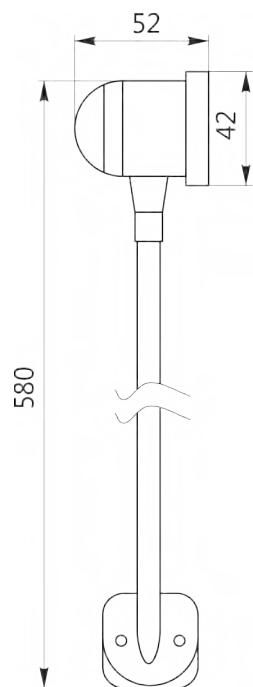

The L-112 lamp provides night lighting for workstations, console controls and other equipment. A gooseneck holder allows easy adjustment; the two-hole base is a perfect solution for a secure mounting on any surface.

TECHNICAL CHARACTERISTICS

General characteristics		
Model	L-112-24	L-112-12
IP rating	IP 22	
Weight	0.275 kg	
Storage temperature	-60...+70 °C	
Operating temperature	-15...+55 °C	

Electrical characteristics		
Power supply voltage	24 VDC	12 VDC
Power consumption	10 W	5 W
Bulb type	halogen	

L-112 dimensional drawing

Space-saving keyboard
UKT-801

The UKT-801 is a space-saving keyboard designed to control computer devices with PS/2 or USB interfaces. The UKT-801 trackball allows the complete substitution of a mouse; made for a small-scale workspace.

TECHNICAL CHARACTERISTICS

General characteristics	
Dimensional drawing	292x160x26.3 mm
IP rating	IP 20
Weight	0.45 kg
Operating characteristics	
Interface	PS/2 (USB)
Number of keys	86
Pointing device	16 mm ball with two buttons
Keys	membrane, quiet tactile

Marine LCD display

MV-xx

The MV-xx04 type, marine display has a diagonal from 10" to 46" and various display resolutions & formats. It is designed to display textual, graphic and other data. It is used for electronic mapping, surveillance and automation systems, radars and workstations, etc. A potentiometer on the front panel is used to adjust the display backlight depending on the room lighting. The MV-xx can either operate with 110/220 VAC or 12/24 VDC (select at order). Various options can be deployed: touch screen, built-in speakers, high brightness matrix and optical bonding. IP rating of the front panel (IP56) can be changed on demand. The device has a galvanic isolation from power mains.

Marine panel computers

MVPC-xx

The MVPC-xx04 and MVPC-xx05 marine panel computers have a display diagonal from 10" to 46" and formats 5:4, 4:3, 16:9, 16:10. They are used for electronic mapping, surveillance and automation systems, radars and workstations, etc. The MVPC-xx can either operate with 110/220 VAC or 12/24 VDC (please select at order). The units can optionally be deployed with built-in speakers, touch screen, high brightness matrix, optical bonding and variable IP rating of the front panel (IP56). The units are provided with galvanic isolation from power mains.

Marine panel computers MVPC-xx04 and MVPC-xx05 type shall be used in a dry environment (IP22).

Marine computer unit
MPC-127

The MPC-127 marine computer unit is intended for a wide range of applications: process control, electronic mapping, automation systems, etc. The MPC-127 can be equipped with discrete graphics, network adapter, trusted platform module or RAID-controller on request.

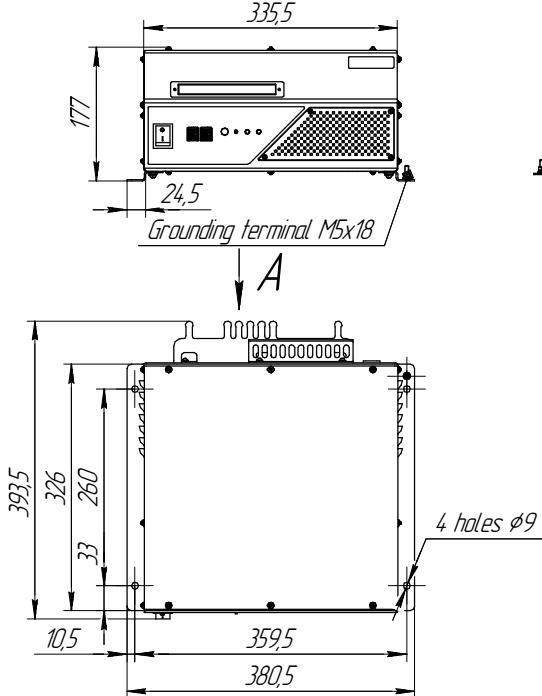

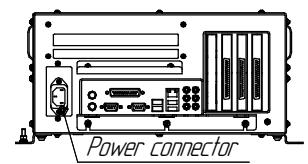

The unit can operate with 24 VDC and 110/220 VAC.

TECHNICAL CHARACTERISTICS

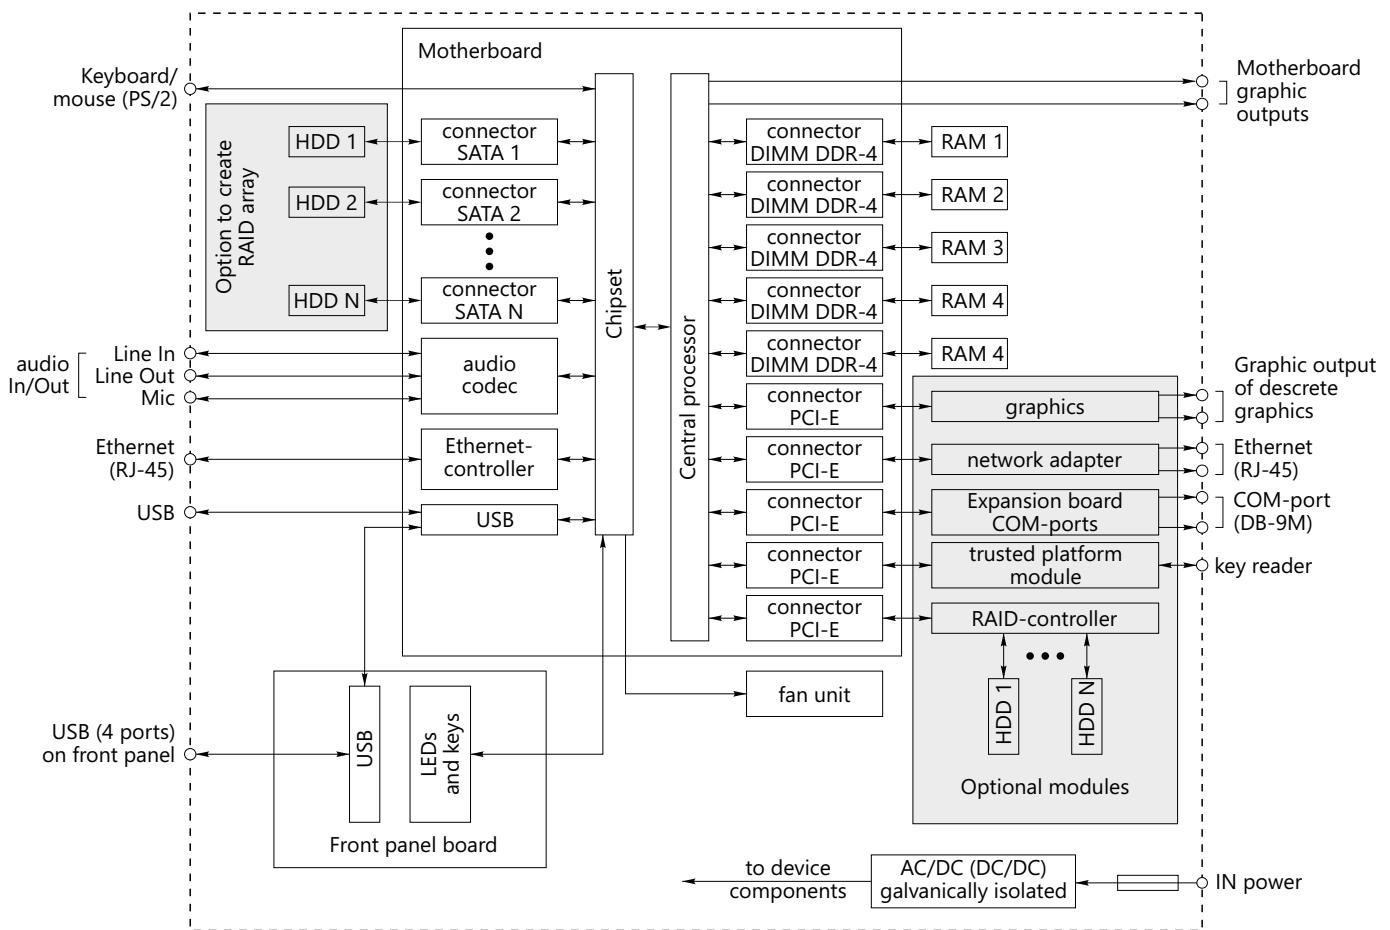

Processor	Cores	From 2 to 18
	Frequency	From 1300 to 4400 MHz
RAM		From 1 GB to 32 GB
HD		From 512 GB to 4 TB
Graphics card		External from 1 GB to 8 GB
Power supply voltage		220 V, 50-60 Hz
		~110 V, 50-60 Hz /
		19...36 VDC
Power consumption		max 550 W
Supported interfaces		
DVD-RW		up to 1
Audio ports (input, output, microphone)		up to 3
USB ports		up to 8

Ports to connect monitor (VGA/DVI/HDMI/Display Port)	Up to 1 VGA, up to 2 DVI, up to 4 HDMI, up to 4 DP Total number up to 4
LAN (Ethernet 10/100/1000 Base-T)	Up to 4
COM F (RS232)/ COM (RS232/422/485)	Up to 6
PS/2 (Keyboard and manipulator)	Up to 2

Marine computer unit

19-MPC-127 (1U)

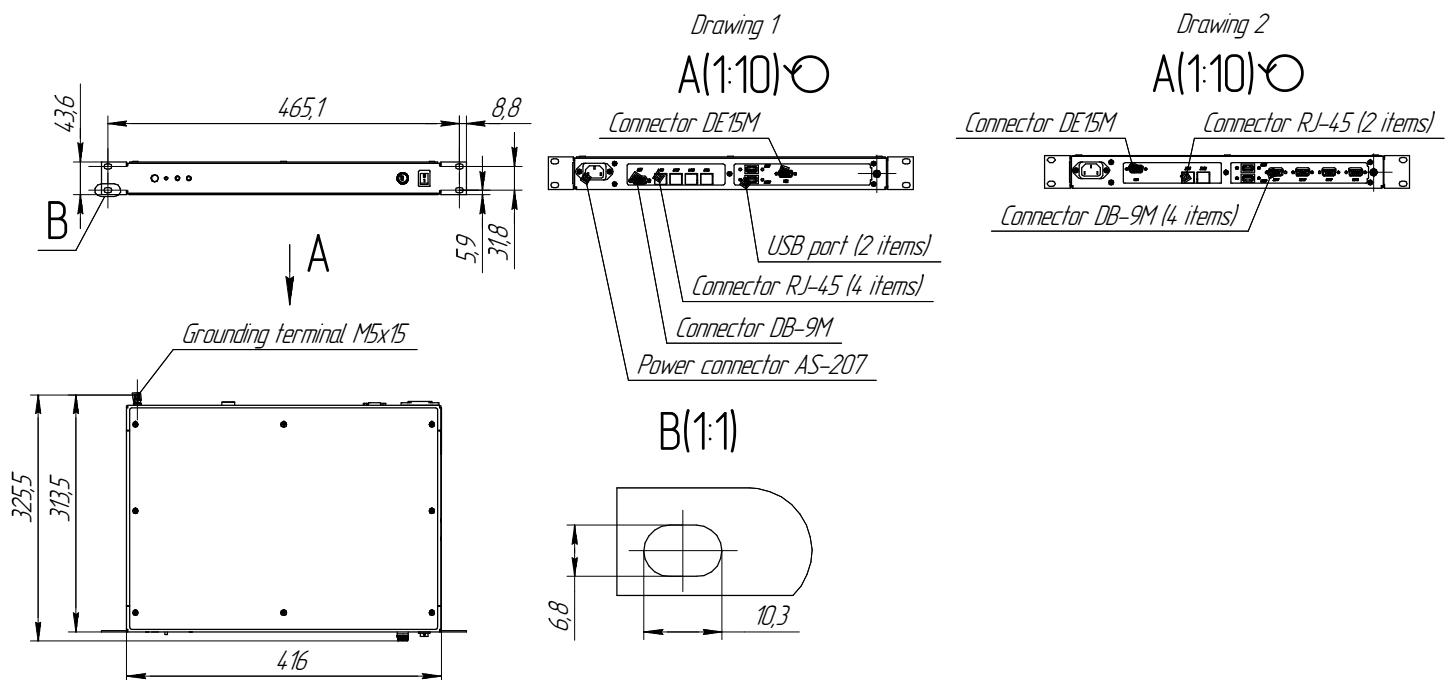

The 19-MPC-127(1U) marine computer unit can be used for process control, electronic mapping, automation systems, etc. The unit is designed to fit into a 19" rack. The unit can operate both with 24 VDC or 110/220 VAC. The 19-MPC-127(1U) designs are offered with various numbers of network and COM-ports. The VGA interface is used to display graphic data. The device has a galvanic isolation from power mains.

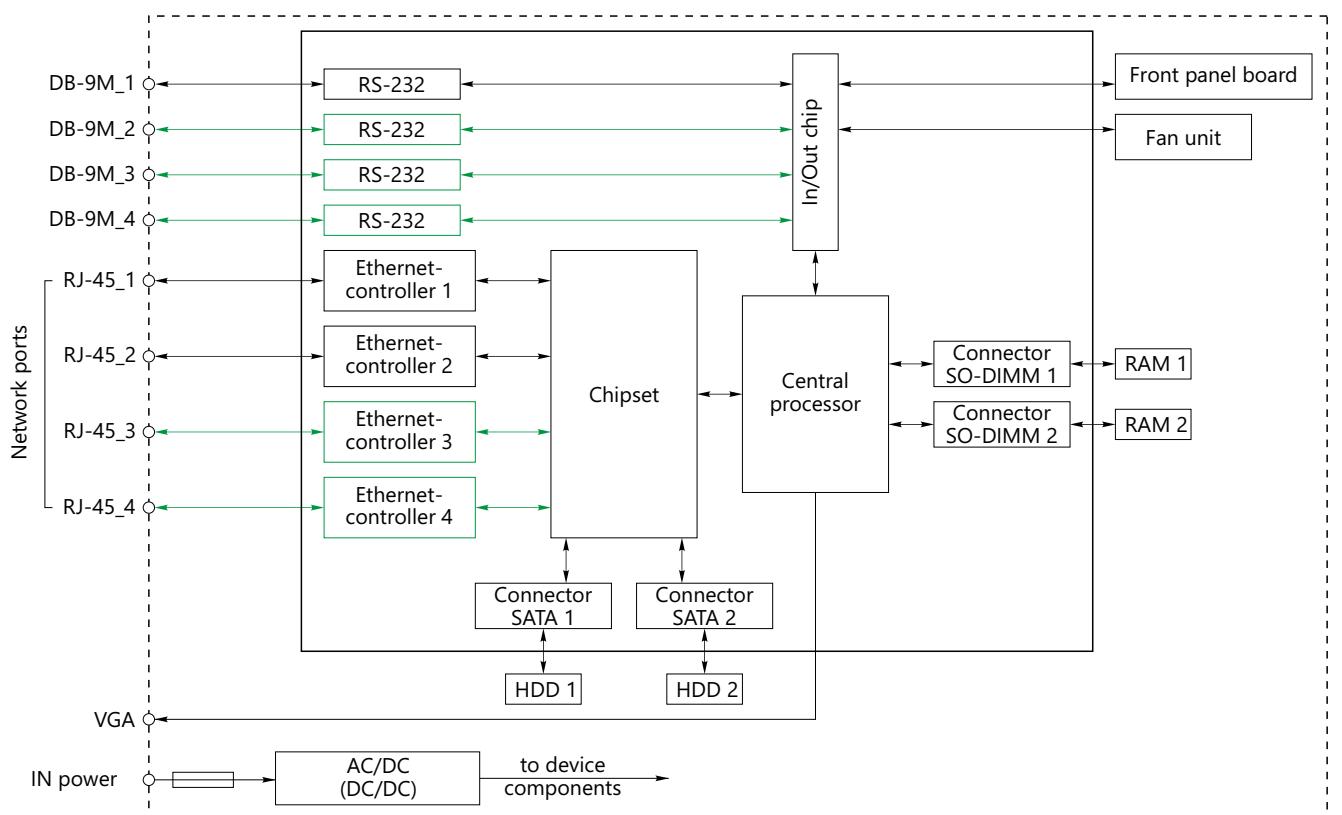

Peripheral devices can be connected via 2 USB-ports on the back panel of the 19-MPC-127(1U).

TECHNICAL CHARACTERISTICS

Design	1	2
Processor	Intel Atom Processor D525 2x1.8 GHz	
RAM	1...4 GB (DDR3)	
HD type and capacity	SSD 60 GB...4 TB (standard – 120 GB), HDD 120 GB...10 TB (option)

Marine computer unit

19-MPC-127(4U)

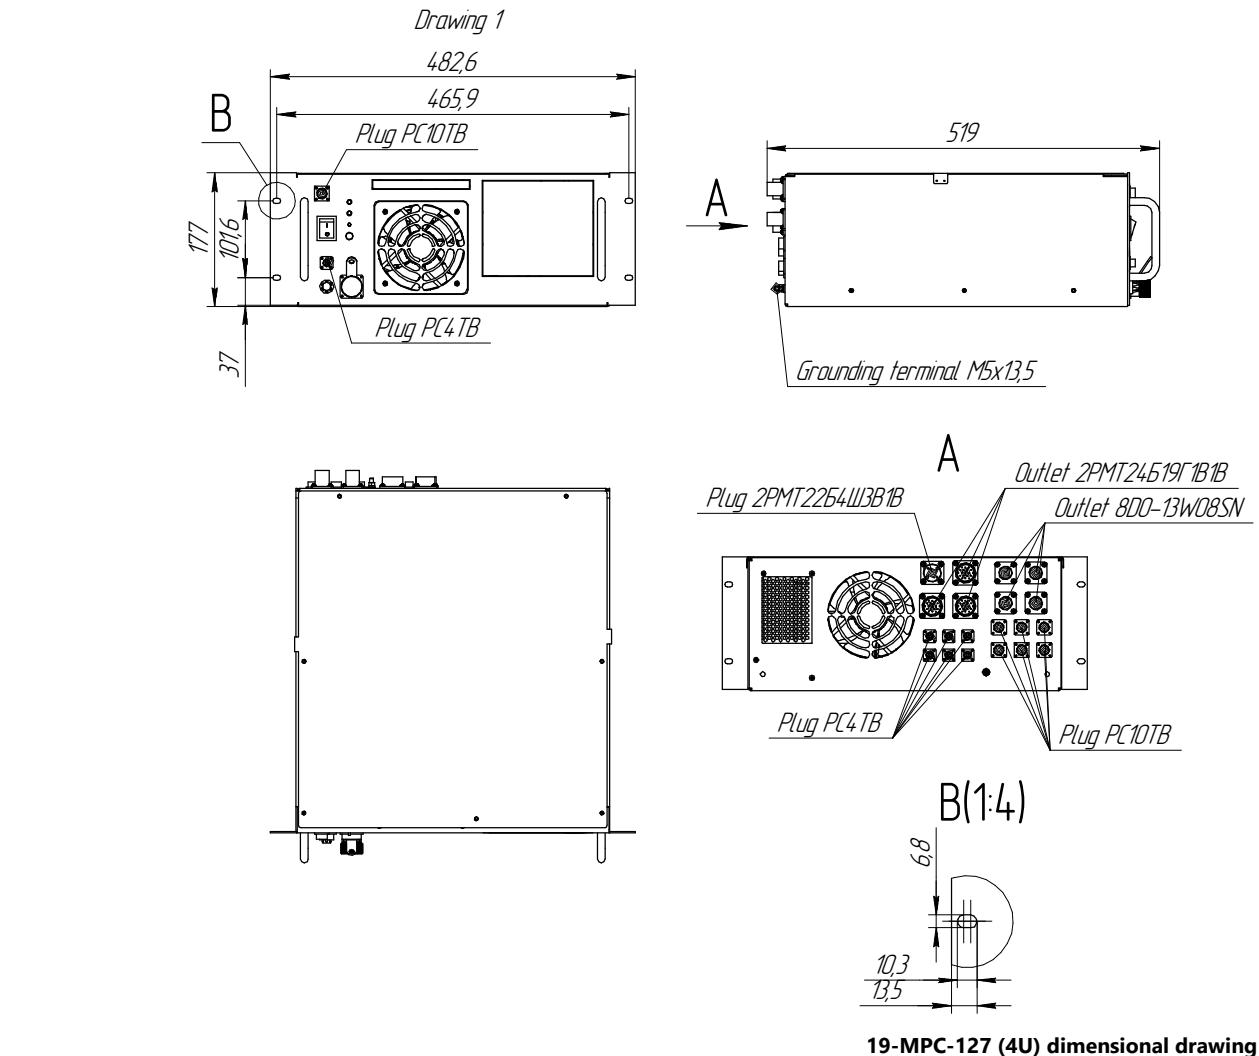

The 19-MPC-127(4U) marine computer unit is an ATX motherboard-based computer, designed for installation into 19" rack. It is used for process control, electronic mapping, automation systems, etc.

The device has a built-in RAID-controller, providing data back-up based on motherboard specifications. The 19-MPC-127(4U) can operate both with 24 VDC and 110/220 VAC. The device has a galvanic isolation from power mains and an input for a standby power source with an automatic switchover in case of a power supply failure.

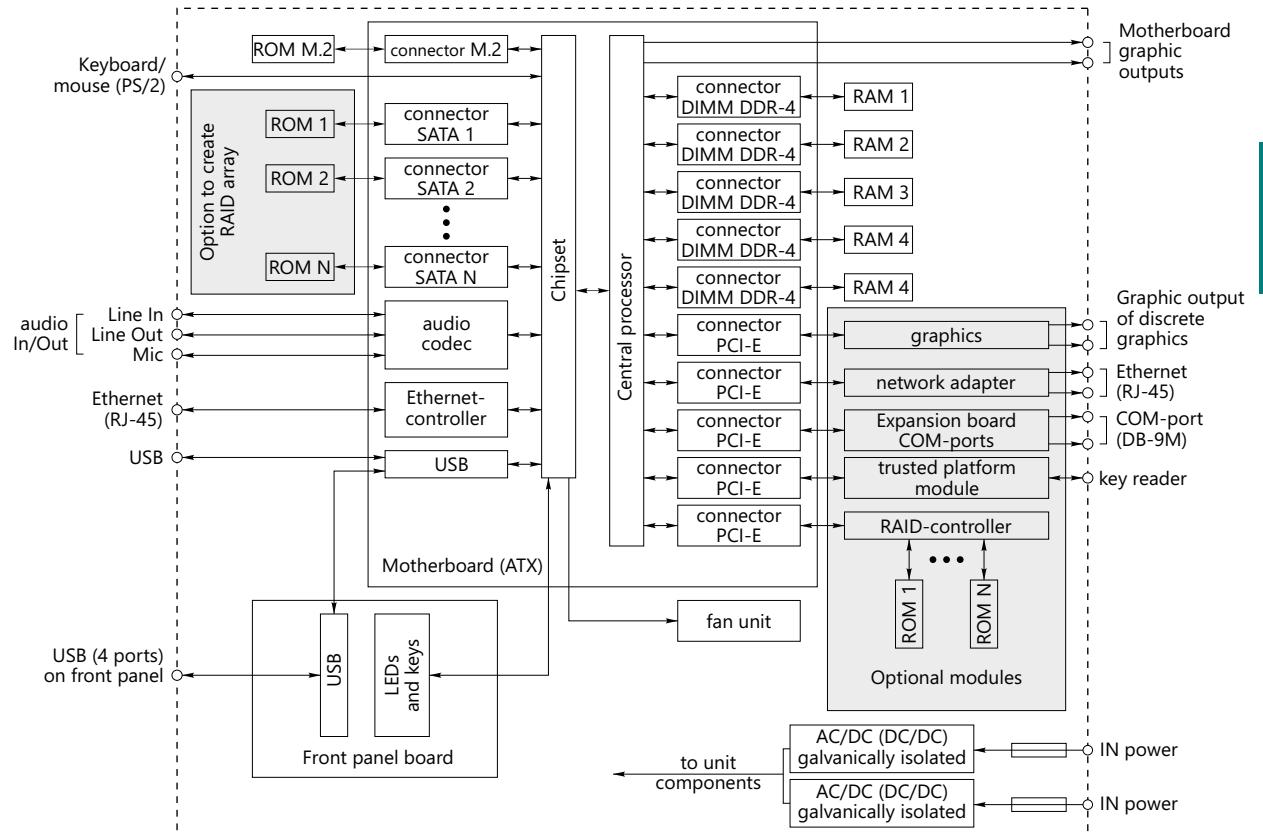

The unit can be optionally equipped with discrete graphics, network adapter, COM-ports expander or trusted platform module.

TECHNICAL CHARACTERISTICS

Processor	Cores	From 2 to 18	LAN (Ethernet 10/100/1000 Base-T)	Up to 4

Expansion board

ERP-128/ERP-128-6R4

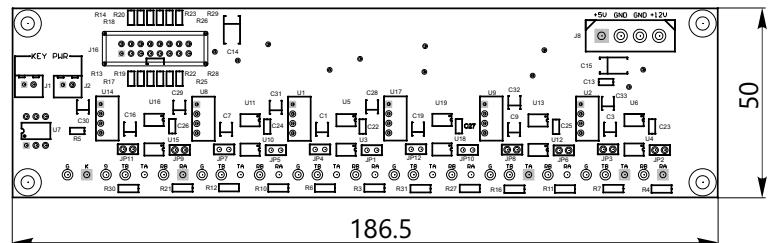

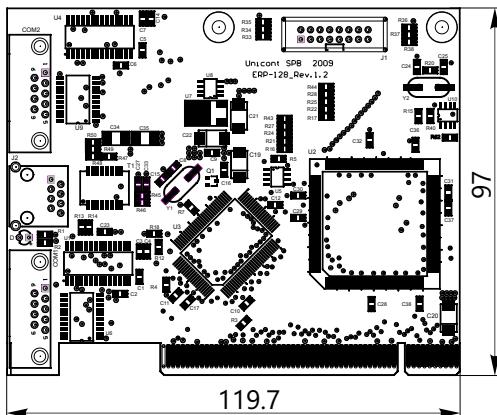

The ERP-128 expansion board allows the increase of COM and LAN ports through a PCI bus. The basic design includes 2 COM (RS-232) and 1 LAN ports. It can be optionally combined with the expansion board ERP-128-6R4, providing 6 ports RS-422 with screw terminals and a connector for an external PC power key. Both boards have COM-ports overvoltage protection. The expansion board has a galvanic isolation from the PCI bus and COM-ports.

TECHNICAL CHARACTERISTICS

	ERP-128	ERP-128-6R4
General characteristics		
Storage temperature	-60...+70°C	-60...+70°C
Operating temperature	-20...+55°C	-20...+55°C
Weight	0.095 kg	0.11 kg
Operating characteristics		
Power supply voltage	5 V (PCI connector)	5 V
Number of output ports	2xRS-232 (DB-9F) 1xLAN (RJ-45)	6xRS-422 (screw terminals), 1 button to start PC
Ports protection	Short-circuit	Short-circuit, galvanic isolation

Digital repeater (LED)

DR-109

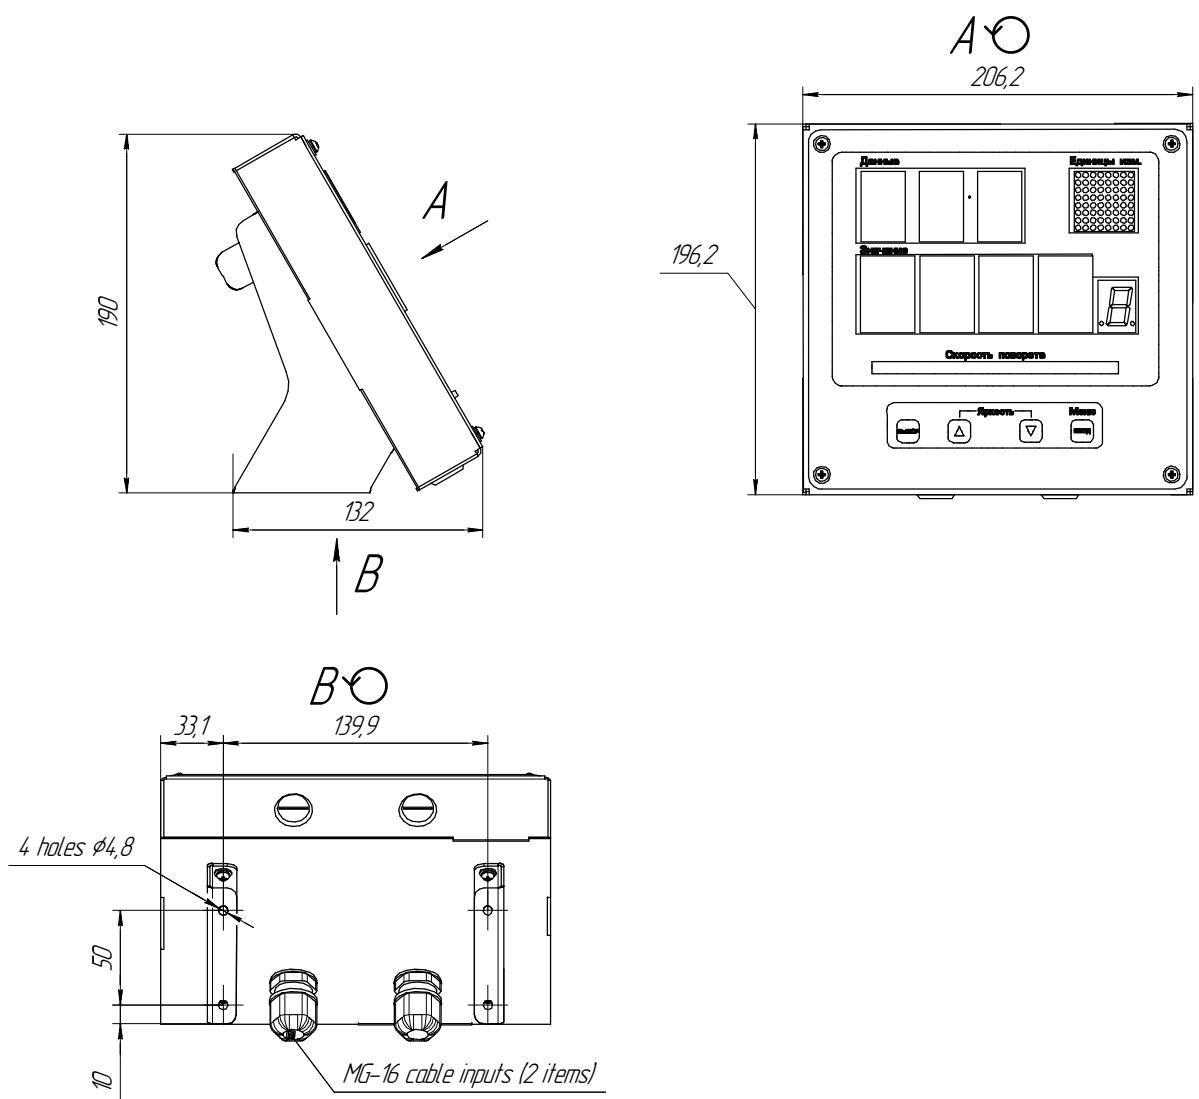

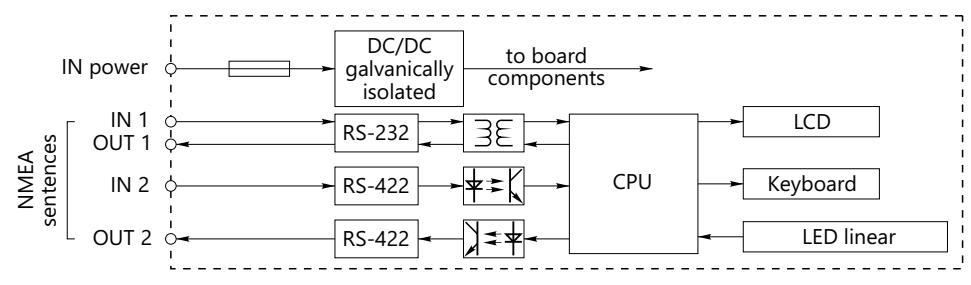

The DR-109 multipurpose digital repeater allows the visual indication of digital data received in NMEA 0183 sentences through RS-232 and RS-422/485 serial interfaces. The DR-109 provides sequential displaying of up to 3 data types on the built-in LED indicator (ship speed and heading, depth below keel, current time and weather conditions). The data of ship turn rate may be displayed regardless of main data on the built-in LED linear.

TECHNICAL CHARACTERISTICS

General characteristics	
IP rating	IP 22 (optionally IP 65)
Storage temperature	-60...+70°C
Operating temperature	-15...+55°C
Weight	2 kg

Characteristics of inputs	
Number of input ports	2
Supported interfaces	RS-232 and RS-422
Max receive rate	115200 bit/s

Electrical characteristics	
Power supply voltage	18...36 VDC
Max power consumption	10 W
Galvanic isolation from power mains	+
Reverse polarity protection	+

DR-109 dimensional drawing
